Bishul — Cooking

Cooking (בִּשּׁוּל) refers to preparing food in heated water (or other fluids, see below).

הלכה א' בבישול

Whether cooking (a mixture that is intrinsically permitted to be cooked but not eaten, in an instance where an observer seeing this might be misled that eating such a mixture or a similar mixture that is likewise prohibited) can be prohibited because of הלכה א' בבישול — 2 FV& FVB " F†R Ø"b æB é

The הלכה א' בבישול (הלכה א' בבישול ב' †öÆG2 —B 6 âÂ ut the הלכה א' בבישול (הלכה א' בבישול ב' F† B —B 6 ææ÷B &V6 W6R ày observ cooking the (seemingly) forbidden mixture for medicinal or other non-eating purposes. ^[1]

1. The problem with the הלכה א' בבישול is that his point that seeing someone cook won't lead to the assumption that eating is permitted because there are other valid reasons to cook doesn't help by הלכה א', נ"ח הלכה א' &V6 W6R —Bw2 &ö†-&—FVB †]5‡]Uè]•Ü^¥‡ to *cook* meat and milk together. If an observer thinks that the cooking of, say, chicken and milk is for medicinal purposes, we should be worried that he'll conclude that cooking *meat* and milk for medicinal purposes is permitted. R' Yitzchok Dov Lefkowitz told me in the name of R' Heinneman that the הלכה א' בבישול can be explained as holding like the הלכה א' בבישול ב' †öÆG2 F† B 6öö¶ cooked *for the purpose of eating*. Therefore, if someone sees another person cooking chicken with milk, assumes that it's meat and milk, assumes that he's cooking the mixture for medicinal purposes, and therefore concludes that cooking meat and milk for medicinal purposes is permitted, he still won't transgress an הלכה א' בבישול, הלכה א' בבישול... הלכה א' בבישול &V6 W6R †R F-FâwB 6öö² F†R ÖV B æB Ö-Æ² f purpose of eating.

In] é^, Ñ]uÜ]

Cooking:

In the context of] é^, Ñ]uÜ] Â 6öö¶—æ† 2 Gpo definitions: a general definition of causing flavor to transfer, and a specific definition of cooking in water or other liquids. When the Torah prohibits cooking meat and milk, it means the second definition of cooking in water (^•Ö" ^" ä]c¥Ð) (when heated by a flame, not the sun or hot springs^[1]), and possibly roasting^[2], putting cold meat into hot milk or vice versa^[3], pan-frying^[4], smoking^[5], and cooking in water heated by hot springs or other non-flame sources^[6].

Possible]5Ð]Uè]•Ü^¥Ð Cooking Methods:

Roasting (^eÜ]'“

Roasting differs from cooking^[7] in that the food being roasted is not immersed in liquid, such as on a grill or ungreased griddle. There is some debate whether roasting] é^, Ñ]uÜ] —2 &ö†—&—FVB Þ]5Ð]Uè] The ^Eè]' ×]5é is of the opinion that it is]åÓ] Ö^...Ü]•ê] ‡6VR á' ^EÖ ^ %ç] f÷" †—2 &öög2â' è^%ç"] ...é. holds that roasting is not a]5Ð]Uè]•Ü^¥Ð method of cooking] Ñ"]rà

^¥ê] Ô]%Ñ^f

When something hot comes into contact with something cold, whether the hot item heats the cold item or the cold item cools the hot item — the consequence being whether the items cook together and thereby transfer flavors to each other — is debated in the Gemara (source). We Pasken that whichever item is lower (although according to many this is actually interpreted to mean the stationary item) extends its state to the upper (moving) item (^¥ê] Ô]%Ñ^, 'Â 6ò –b F†R Æðwer (stationary) item is hot, it makes the upper (moving) item hot as well, and flavor transfers throughout both. If, however, the upper (moving) item is hot and the lower (stationary) item is cold, the lower cools the upper and the two items just need ^uÜ]•ä]Bâ reason [EÓ]nô enough, even though they're both cold, is that the cooling is not instant and in the time it takes for the upper item to cool the flavor can transfer]µÓ]' ç]ÅÛ^EÔ (see ^' %Ú]•Ö"]2 á' ^eÐ ^ %ç]b'âÒ ‡6VR é]R%â]•). As a consequence of this, when cold milk falls onto hot meat or cold meat falls into hot milk, according to many this would be considered akin to roasting, as the hot base would heat the cold item falling onto it, causing flavors to transfer between them, rendering the mixture] é^, Ñ[uÜ] à

Hot into Cold:

If hot meat fell into cold milk, the meat needs ^uÜ]•ä]Bâ The law regarding the milk is a matter of dispute . According to the],%Ö (^ r æ] á"r Ö), the milk needs ^uÜ]•ä]Bâ According to the ^' %Ú (^•Ý ^ %ç]r' the ^uÜ]•ä]Bâ Æ— V–B Ö—ces in and is not a distinct part, the milk does not need ^•é]•Ý.

The $\text{J}\hat{\text{a}}\hat{\text{O}}\text{]\hat{\text{d}}\text{ }\hat{\text{D}}\text{]}\hat{\text{e}}\text{]E}\hat{\text{Y}}\text{ (}\text{J}\hat{\text{E}}\hat{\text{O}}\text{]}\hat{\text{D}}\text{]}\hat{\text{e}}^{\wedge}\%_{\zeta}\text{"]}\hat{\text{e}}\text{]}\hat{\text{O}}\text{'}$ $\text{w}\&\text{VW2}\text{ v}\text{—F, F}\hat{\text{+}}\text{R}\hat{\text{e}}\text{"]}\text{f}\text{ F}\hat{\text{+}}\text{B F}\hat{\text{+}}\text{R}\hat{\text{O}}\text{—}\hat{\text{A}}^2\text{ F}\hat{\text{o}}\text{W2}\hat{\text{a}}\div\text{B}\hat{\text{a}}\text{VVB}\hat{\text{e}}^{\wedge}\cdot\hat{\text{U}}$
the milk as part of an uninterrupted stream ($\wedge\% \hat{\text{U}}^{\wedge}\dots\hat{\text{O}}\text{]}'\hat{\text{e}}^{\wedge}\hat{\text{a}}^{\wedge}\zeta\text{]E}_{\zeta}\text{]\cdot}\hat{\text{U}}\text{]U}\times$), so even the $\wedge\text{u}\hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]B}\text{ g}\&\hat{\text{o}}\hat{\text{O}}\text{ F}\hat{\text{+}}\text{R}\hat{\text{O}}\hat{\text{V}}\text{B}\text{—}2\hat{\text{o}}\hat{\text{a}}\hat{\text{C}}\text{'}$
and is not actually $\text{]}\hat{\text{a}}\text{]U}\hat{\text{e}}$. In such a case, the requirement to remove the $\wedge\text{u}\hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]B}\text{ g}\&\hat{\text{o}}\hat{\text{O}}\text{ F}\hat{\text{+}}\text{R}\hat{\text{O}}\hat{\text{V}}\text{B}\text{—}2\hat{\text{o}}\hat{\text{a}}\hat{\text{C}}\text{'}$
to the optics of eating the portion of the meat that came into contact with milk. Such a concern
doesn't apply to the milk because there is no distinct $\wedge\text{u}\hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]B}\text{—}\hat{\text{a}}\text{ f}\hat{\text{C}}\text{V}\text{—E}\hat{\text{a}}'\text{—}\hat{\text{a}}\times'\div\text{—}\hat{\text{a}}\text{—}\hat{\text{o}}\hat{\text{a}}\hat{\text{A}}\text{ F}\hat{\text{+}}\text{R}\hat{\text{e}}\text{"]}\text{f}$ could agree
to this, although $\wedge,\text{r}\hat{\text{D}}\text{]}\hat{\text{e}}\text{]E}\hat{\text{Y}}\text{]}\hat{\text{U}}\text{]}\cdot\hat{\text{O}}\text{]R}\hat{\text{U}}\text{]}\cdot\hat{\text{U}}\text{]}\hat{\text{U}}^{\wedge}\text{e}$ disagrees with me. This argument hinges on whether the $\wedge\text{'}\%$
the ruling of the $\wedge\cdot\hat{\text{O}}\text{'\text{^{\wedge}}}\text{'}\text{—}\hat{\text{A}}\text{—W2}\text{ F}\hat{\text{o}}\hat{\text{d}}\hat{\text{e}}\div\text{F,}\hat{\text{a}}^{\wedge}\text{E}\hat{\text{a}}^{\wedge}\text{r}\hat{\text{O}}\wedge\text{u}\hat{\text{U}}\text{]}\hat{\text{A}}\hat{\text{O}}\text{]r}\hat{\text{a}}\text{B}\hat{\text{a}}\div\text{B}\text{—}2\hat{\text{e}}\text{VfW}'\&\text{—}\hat{\text{a}}\text{r}\text{ }\S\text{W7B}\text{ F}\hat{\text{o}}\text{ F}\hat{\text{+}}\text{R}\hat{\text{c}}\text{]}\hat{\text{A}}\hat{\text{U}}$
It would seem that the $\text{]}\hat{\text{U}}^{\wedge}\text{f}\text{ }\hat{\text{D}}\text{]}\hat{\text{U}}^{\wedge},\dots\hat{\text{O}}\text{]U}\hat{\text{N}}\text{]}\hat{\text{N}}\text{]}\hat{\text{O}}^{\wedge}\text{e}\hat{\text{e}}\text{]E}\hat{\text{P}}^{\wedge}\text{E}\hat{\text{e}}^{\wedge}\cdot\hat{\text{U}}\text{]}\hat{\text{O}}\text{'}$ $\text{w}\&\text{VW2}\text{ v}\text{—F, }\hat{\text{+}}\text{—}\hat{\text{O}}\hat{\text{A}}\hat{\text{e}}\text{V6}\text{ W6R}\hat{\text{+}}\text{R}\text{ }\hat{\text{6}}$
consumed without $\text{]}\hat{\text{U}}\text{]}\dots\hat{\text{O}}\text{]}\hat{\text{A}}\hat{\text{a}}\text{B F}\hat{\text{+}}\text{W}\&\text{Vf}\div\&\text{R F}\text{—}\hat{\text{6}}\text{ w}\&\text{VW2}\text{ v}\text{—F, F}\hat{\text{+}}\text{R}\hat{\text{e}}\text{"]}\text{f}\hat{\text{a}}\text{B P}$ xplains the $\wedge\text{...}\hat{\text{D}}\text{]}\text{ }\hat{\text{2}}\text{ vR}$
The $\wedge\text{Y}\hat{\text{e}}\text{]U}\hat{\text{D}}\text{]U}\hat{\text{e}}\text{]u}\hat{\text{B}}\text{ (}\text{J}\hat{\text{E}}\hat{\text{O}}\text{]}\hat{\text{D}}\text{]}\hat{\text{a}}\text{'\text{^{\wedge}}}\text{f}\hat{\text{e}}\text{]}\hat{\text{O}}\hat{\text{a}}\text{'\text{^{\wedge}}}\text{r}\hat{\text{O}}\text{)}$ adds that this permit applies ~~to the meat and milk~~, which need to
prohibited $\text{J}\hat{\text{a}}\hat{\text{O}}\text{]}\hat{\text{O}}^{\wedge}\dots\hat{\text{U}}\text{]}\cdot\hat{\text{U}}^{\wedge}\text{f}\hat{\text{D}}$, but not hot $\text{]}\hat{\text{U}}^{\wedge}\hat{\text{O}}^{\wedge},\text{F}\hat{\text{+}}\text{B fV}\hat{\text{A}}\hat{\text{A}}\text{—}\hat{\text{c}}\text{F}\hat{\text{o}}\hat{\text{6}}\hat{\text{o}}\hat{\text{A}}\hat{\text{O}}\text{]}\cdot\hat{\text{e}}^{\wedge},\hat{\text{A}}\text{ P}$ xcept $\text{]}\hat{\text{O}}^{\wedge}\text{E}\hat{\text{a}}\text{]2}\hat{\text{D}}^{\wedge}\dots\hat{\text{O}}\text{]}$
without cooking, the food would be $\text{]}\hat{\text{a}}\text{]U}\hat{\text{e}}\text{]}\hat{\text{a}}\hat{\text{O}}\text{]}\hat{\text{O}}^{\wedge}\dots\hat{\text{U}}\text{]}\cdot\hat{\text{e}}^{\wedge}\text{]}\hat{\text{a}}$

If cold milk were poured on hot meat, whether the milk is] á]Uè depends on the speed with which it was poured. If it was poured slowly, all of the milk is] á]Uè, because as the stream hits the meat the milk at the tip of the stream pushes aside the milk already in contact with the meat, so that all of the milk directly contacts the meat and is therefore part of the ^uÜ]•ä]B ±6VR ä"^\\$ á"^\r Ö who brings from the

Pan-Frying:

The ^Eè]’ ×]5é is of the opinion that it is]âÓ] Õ^...Û]•ê] ‡6VR á’ ^EÖ ^ %ç] f÷" †—2 &öög2â’ The ^B%ê (argue and say it is only]âÓ^...Ñ^ ß.

R' Lefkowitz told me that deep frying is considered cooking, not frying. (Although ^...é]' -â ¥á^ Ô]5è]•ß]2 6V to me to indicate otherwise)

Smoking (]åâ]Ué]ò“

1. see] Û^•Õ]Â Ò 6öö¶[-ærÂ Û]Å Û ^•à)'Â â ð

Hot springs (specifically the hot springs of Tiberias) are used as the Talmudic shorthand for heat that is not derived from fire. This category includes geo-thermal heat and solar heat. It is compared in the *Ḥōl* [חול]’ Fò D^{a%} [אש],¹⁴ and so shares its

A microwave and an induction stove are controversial, because R' Moshe Feinstein holds that any normal cooking method is considered *bishul* but there are those that argue.

7

Definite]5è] à]ò 6öö¶-ær ÖWF†öG3

Soaking (μÑ)Ué):

Soaking food for 24 hours in liquid causes it to transfer as if the mixture and the utensil it is contained in were cooked. However, meat and milk that are soaked together are *not* considered to have been cooked together. If meat and milk are soaked together, the cooking is derived cooking is included in the biblical prohibition of cooking meat that had been soaked in milk or vice versa, that *would* be cooking meat and milk together.

That's all as far as $\text{J}\mathfrak{D}\text{J}\mathfrak{U}\mathfrak{e}\text{J}\bullet\mathfrak{U}^\wedge\mathfrak{Y}\mathfrak{D}$ is concerned, but if meat and milk were soaked together they would be prohibited $\text{J}\mathfrak{a}\acute{\text{O}}^\wedge\dots\tilde{\text{N}}^\wedge\mathfrak{B}$ to be eaten

Salting ([aÜ]•x]B“

When salted foods come in contact,] Ü]•â]Uê are transferred between them. Soaking^[5], this does not constitute cooking]áÓ] Õ^...Û]•ê 2 `ar as the laws of] Ñ"]râ Therefore, if salted meat and dairy come into contact, they would each be prohibited to be eaten]áÓ^...Ñ^ ß and to be cooked]áÓ] Õ^...Û]•ê ‡6-æ6R F†Py of the other).

Normally, salt on a food effects a one-way transfer, meaning that if salted meat came into contact with unsalted dairy, the dairy would be prohibited and the meat would stay permitted (כל המלח בשרו) [6]. If the unsalted food was liquid, however, the salted food will absorb some of it as well [7]. Therefore, if salted meat came into contact with unsalted milk, they would both be מלין.

Meat and Milk Combined Without Cooking:

1. see $\wedge \forall \hat{a} \wedge \dots \tilde{O}] \tilde{O} \wedge \phi \hat{A} \& C \text{ “} \dagger b \hat{A} \hat{a} \delta$

2. p. ?

3. p. ?

4. see $\text{[ãÜ]} \cdot \times \text{[BÂ †ðw "^\dots\tilde{O}^\wedge\Upsilon \times]}$ is $\text{[ãÜ]} \cdot \times \text{[}\mu\text{è]Uê]sòÂ \hat{a} \delta}$

5. p. 25

6. see]âÜ]•×]BÂ c6FF"Â â ð

7. see [ãÜ]•×]BÂ 3s“3,Â â ð

As discussed above^[1], meat and milk cannot be eaten together, even if not cooked together. This differs from even [\[5è\] à\]ò 6öö¶|—ær ÖWF†öG2 —â F† B F†W&R —2 æò Ñ\]ÅÙ^%Ô](#) transfer at all. This is why, for example, a ham and cheese sandwich would be prohibited to eat, and is the foundation for other important laws, such as [Waiting Between Meat and Dairy](#)^[2] and [Joint Placement on a Table](#)^[3].

General Contact:

If cold meat and dairy touched one another: if they were moist, they require $\text{[EÓ]uÔ} \cdot \tilde{\text{O}}''\text{æ]} \text{ ¥Ð}$, and if they were dry then nothing need be done because nothing transferred from one to the other ($\wedge \% \acute{\text{U}} \wedge \cdot \acute{\text{Y}}] \acute{\text{é}} \grave{\text{O}}$ $\text{JEN''}]r' \hat{\text{A}} \text{VæÆW72 F†Py}$ were salted, in which case they would need JEÓ]uÔ (see $\wedge \dots \hat{\text{a}} r \% \text{Ð} \wedge \cdot \acute{\text{Y}} \text{jãÑ]} \cdot \text{Ð jãá} \wedge$

Immersion:

If meat [assuming it was not salted enough to effect salting] was immersed in milk, there are multiple factors that can cause the meat to absorb milk to the point that [EÓ]uÔ will not be able to permit it, and there are multiple opinions as to which factors or combination thereof cause this absorption. The factors are:

- Roasting - the meat previously being roasted (or baked or cooked, see ^...P"] ...æ] ¥Ö)) makes it more absorptive according to some.
- Crevices - some meat has deep crevices into which the milk it is immersed in can seep and from which it can't be removed.
- Spicing - if the meat was heavily spiced, it can take on a level of ~~judgment~~ ^{judgment} the spice and become more absorptive.

The $\wedge^{\%}\dot{U}(\wedge^r\mathfrak{x}] \ \acute{a}^{\wedge r}\hat{U}]$, $\mathcal{A} \rightarrow \mathbb{Z} \times \mathbb{W} \times \mathbb{F} \times \mathbb{R} \times \mathbb{F} \times \mathbb{V} \times \mathbb{R} \times \mathbb{Z} \times \mathbb{Z}$ & regarding these factors:

1. p. ?

2. p. 60

3. p. 59

4. see Measurements, Surface Level, p. ?

5. p. 25

6. p. ?

- The opinion of the Ḥanafi, Shafi'i, Maliki, Hanbali, and Zahawi schools is that if meat had crevices or was heavily spiced, even if it was raw, the milk penetrates deep into the meat and prohibits it entirely.
- The Ash'ari, Maturidi, and Shafi'i schools (and possibly others) hold that cold roasted meat would just need to be washed like any other meat [2], and hot roasted meat would require to be cooked again like any case of hot into cold [3]. If the roasted meat had crevices or was heavily spiced and was hot [it seems that according to this opinion that if even roasted meat was cold, crevices and spicing would not be an issue.], it is entirely prohibited.
- The Hanbali, Shafi'i, and Maliki schools agree that roasting alone does not make meat halal; they say that so long as the meat is roasted, even if it's cold, crevices and spicing would cause it to absorb the milk and become haram.

The $\wedge \tilde{O}'' \wedge$... $\mathfrak{a} \mathbb{Y} \ddot{O}$) rules like the second opinion, though the $\wedge \dots \mathfrak{P}'']$... $\acute{e}] \ddot{O}$ ' 6 —2 vR 6†÷VÆB &R 7G&—æv opinion that even cold roasted needs $\wedge \mathfrak{U} \ddot{U}] \cdot \mathfrak{a}] \mathfrak{B} \hat{A}$ VæÆW72 Fö—ær 6ò v—ÆÂ &W7VÇB —â 6—væ—`icant financi $\mathfrak{J} \mathfrak{a} \acute{e}] \mathfrak{U} \mathfrak{N}] \mathfrak{B} \cdot \mathfrak{a} \mu \mathfrak{F} \dagger \mathfrak{R} \acute{e}] \mathfrak{a} \% \mathfrak{D}$ also says to be lenient $\mathfrak{J} \mathfrak{a} \ddot{U}] \cdot \times] \mathfrak{A} \mathfrak{a}] \mathfrak{A} \ddot{U}$ and its $\wedge \mathfrak{U} \ddot{U}] \cdot \mathfrak{a}] \mathfrak{B}$ VÆ—`ies as $\mathfrak{J} \mathfrak{E} \mathfrak{a}^{\wedge} \acute{O} \mathfrak{J} \mathfrak{a} \acute{e}] \mathfrak{U} \mathfrak{N}] \mathfrak{B} \mathfrak{f} \mathfrak{V} \mathfrak{A} \hat{A} - \zeta \mathfrak{F} \ddot{o} \ddot{O} - \mathfrak{A}^2 \hat{A}$ W& leniencies: not considering the meat to be salted to the level of $\mathfrak{J} \mathfrak{a} \ddot{U}] \cdot \times] \mu \acute{e}] \mathfrak{U} \acute{e}] \mathfrak{r}$ æB æ÷B &W V—&—ær ç $\mathfrak{J} \mathfrak{A} \ddot{U} \wedge$ roasted meat that fell into milk, and we don't permit combined $\mathfrak{J} \mathfrak{E} \mathfrak{a}^{\wedge} \acute{O} \mathfrak{J} \mathfrak{a} \acute{e}] \mathfrak{U} \mathfrak{N}] \mathfrak{B} \mathfrak{A} \mathfrak{E} \mathfrak{V} \mathfrak{a} - \mathfrak{V} \mathfrak{a} 6 - \mathfrak{W} 2 \dots \emptyset] \mathfrak{b} \acute{e}] \ddot{O} \mathfrak{a}''$ hesitant to be lenient even $] \hat{O}^{\wedge} \mathfrak{E} \mathfrak{a}] 2 \mathfrak{P}^{\wedge} \dots \tilde{O}] \hat{O}$, because there are so many $\wedge \dots \mathfrak{D}^{\wedge} \cdot \mathfrak{a}] \cdot \acute{Y}$ who are stringent.

Even according to the opinions that cold roasted meat absorbs milk and becomes prohibited, we do not assume that the meat exudes any flavor back in to the milk, and so the milk remains permitted ($\wedge \text{'}\dot{U} \wedge \text{'}\dot{Y} \wedge \text{'}\zeta \text{]}\mu\hat{O}$).

Dehydrated Meat:

4. see [ãÜ]•×]BÂ Þ]ÅÜ]r Ü^eÜ]'Â â ð

The ^{...P"} , äc¥) proposes a solution to this problem wherein one could dehydrate the stomach until it is so dry that it's "like wood and has no moisture of meat." Such flesh can be used to make cheese, as the dry enzymes will still have an effect but there will be no flavor of meat transferred into the milk.

He adds that the same dehydration process would also remove the ability to impart flavor from the other intestines.

2. see $\wedge \forall \hat{a} \dots \tilde{O}] \tilde{O}^{\wedge} \hat{A} \text{ sf } V_{cc2} \hat{A} \hat{a} \hat{o}$

$$\wedge \pounds \hat{e}] \hat{O} \mid \% \tilde{N} \wedge f$$

When something hot comes into contact with something cold, whether the hot item heats the cold item or the cold item cools the hot item — the consequence being whether the items cook together and thereby transfer flavors to each other — is debated in the Gemara (source). We Pasken that whichever item is lower (although according to many this is actually interpreted to mean the stationary item) extends its state to the upper (moving) item (אֲשֶׁר הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה, 'אֲשֶׁר הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה'). If the lower (stationary) item is hot, it makes the upper (moving) item hot as well, and flavor transfers throughout both. If, however, the upper (moving) item is hot and the lower (stationary) item is cold, the lower cools the upper and the two items just need to be cooked together (אֲשֶׁר הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה). The reason for this is that the cooling is not instant and in the time it takes for the upper item to cool the flavor can transfer (אֲשֶׁר הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה) (see אֲשֶׁר הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה הָיָה בְּתוֹךְ הַמַּיִם הַזֶּה).

Cooking After Removal From the Flame (]µÜ]' è] é]Uß/^•à]'õé]

]µÜ]' è] é]Uß:

When a pot of food that has been heated to]•Ó ^ Õ]ÅÓ^ is removed from the flame, it retains its ability to cook additional food that is placed in it until it cools to below]•Ó ^ Õ]ÅÓ^¹ This is called a]µÜ]' è] é]Uß. The Rambam disagrees and says that even a]µÜ]' è] é]Uß doesn't cook.

]µÜ]' é^ Û:

If the food in the pot is moved to different utensil, the food loses most of its ability to cook, *even though it's still]•Ó ^ Õ]ÅÓ^* as ^•Ñ^ 6 â öæÇ' 6öö² ç]ÅÙ]EÑ]•é]UÜ, but as far as ^¥â^...Õ] Õ^ 6 â 7F–ÆÂ^ it can't transfer.

]µÜ]' é]ÅÙ^•Ù:

If]µÜ]' è] é]Uß is further moved to a third utensil, it has no ability to cook or transfer] Ü]•â]Uê, *even though it's still]•Ó ^ Õ]ÅÓ^*

1. see ^¥â^...Õ] Õ^ 6 â 7F–ÆÂ^ Û]2 á]UÜ]5é, p. ?

2. p. 85

Depths of Absorption:

When two items come in contact, they will often leave residue on the surface of the other. If that residue must be removed, such as when kosher meat comes into contact with non-kosher meat and the residue of the non-kosher meat must therefore be removed from the kosher meat so it is not consumed with the kosher meat, the removal can be accomplished by rinsing the point of contact (JEÓjuÔ), although for some, more oily things (such as rendered fat, see ^B%ê]•Ö"]2 á' point of contact (^•ä^•Ö^2' —2 &W V—&VB v†—ÆR &—ç6—ærà

When soft, wet surfaces, such as the inside of cucumbers, cannot have substances removed from their surfaces by rinsing, as rinsing such items will not only fail to remove the prohibited substance, it will in fact push it deeper into the surface. The solution in such cases is, therefore, to remove the prohibited substance by means of scraping the surface to remove a very small amount of the surface and the prohibited substance with it (אֶפְסָה אֶת הַשּׁוֹמֵן).

There are certain flavor transfers that only penetrate to a minimal depth within the target, the depth being the thinnest layer of that substance that can be peeled away without falling apart.

This is referred to as]μÓ]’ ç]ÅÛ^EÔ (lit. to the point of peeling), and the area of absorption is itself referred to as a]μÓ]’ ç]ÅÛ^EÔ or just the ^uÛ]•ä]Bà

There are certain flavor transfers that penetrate a fingerbreadth into the target. Such cases are

referred to as absorbing $[\mu\acute{O}]' \grave{a} \dots \grave{U}] \grave{A} \hat{O}$ (lit. to the point of removal), and the area of absorption is itself referred to as a $[\mu\acute{O}]' \grave{a} \dots \grave{U}] \hat{A} \hat{O}$ or just the $\wedge \emptyset] \cdot \ddot{U}] \grave{B} \grave{a}$

Marat Ayin — Appearance

There are many things that should technically be permitted but were prohibited $\text{לאֲדַעַל־בְּעֵינַיִם}$ because they give the appearance of wrongdoing. This is called $\text{חֻקֵּי הַבְּעֵינַיִם}$ (V & æ6R öb F†R Pye).

Basar B'Chalav — Meat and Milk

Note: any citation of a [^]ä[^], F† B —2 F—f—FVB 66÷ ding to the four]uÜ^uÛ]Ò öb F†R Ø]Uè is referring to]•C otherwise specified.

The Prohibition:

The Torah prohibits cooking^[1] meat and milk together, and prohibits the product of such cooking from being eaten or benefitted from (אֲשֶׁר אֵין עוֹלָם לֵאמֹר

The derivation for this law is as follows: the Torah writes (אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר, אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר, אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר 'goat in its mother's milk') three times. The וְאֵין עוֹלָם לֵאמֹר (And it is not an eternal thing) three times in order to prohibit cooking (1), eating (2), and benefitting from (3) a combination of meat and milk. The אֲשֶׁר יִמְצָא בְּעֵינֶיךָ teaches (אֲשֶׁר יִמְצָא בְּעֵינֶיךָ אֲשֶׁר יִמְצָא בְּעֵינֶיךָ אֲשֶׁר יִמְצָא בְּעֵינֶיךָ) an important caveat: the Torah only prohibits eating from a combination of meat and milk that have been *cooked* together, not just combined. He derives this from the fact that all three אֲשֶׁר יִמְצָא בְּעֵינֶיךָ use the language of "don't cook," even though two of them are referring to eating and benefit, respectively.

It is important to note that this only constitutes an absolute permit to *benefit* from a meat/milk combination that has not been cooked together. *Eating* such a combination, on the other hand, is prohibited אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר. Cooking a meat/milk combination of which one or both components are only considered meat or milk אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר is permitted (in regard to the basic אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר; אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר). As well, benefitting from any meat/milk combination that is only prohibited אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר (whether because of the cooking method or the ingredients) is allowed (אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר).

1. see אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר

2. <https://www.hebrewbooks.org/shas.aspx?mesechta=31&daf=115b&format=pdf>

3. see אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר אֲשֶׁר יִמְצָא בְּעֵינֶיךָ בִּשְׂרֵי חֵמָר

There are three terms that must be defined in order to understand the prohibition of כְּסֵף וְזָהָב , חֶמֶד וְקִנְיָן , meat^[2], and milk^[3].

In the context of] é^, Ñ]uŮ] Â 6ööŹ–ær † 2 Gpo definitions: a general definition of causing flavor to transfer, and a specific definition of cooking in water or other liquids. When the Torah prohibits cooking meat and milk, it means the second definition of cooking in water (^•Ö" ^" ä]cŸÐ) (when heated by a flame, not the sun or hot springs^[4]), and possibly roasting^[5], putting cold meat into hot milk or vice versa^[6], pan-frying^[7], smoking^[8], and cooking in water heated by hot springs or other non-flame sources^[9].

Roasting (^eÜ]’“

Roasting differs from cooking^[10] in that the food being roasted is not immersed in liquid, such as on a grill or ungreased griddle. There is some debate whether roasting] é^, Ñ[uÜ] —2 &ö†-&—FVB Þ]5D]. The ^Eè]' ×]5é is of the opinion that it is]åÓ] Ö^...Ü]•ê] ‡6VR á' ^EÖ ^ %ç] f÷" †—2 &öög2â' è^%ç"] ...é holds that roasting is not a]5Ð]Uè]•Ü^¥Ð method of cooking] Ñ"]rà

As discussed above^[1], meat and milk cannot be eaten together, even if not cooked together. This differs from even הם לא יאכלו יחד — אם לא יאכלו יחד — אם לא יאכלו יחד transfer at all. This is why, for example, a deli and cheese sandwich would be prohibited to eat, and is the foundation for other important laws, such as Waiting Between Meat and Dairy^[2] and Joint Placement on a Table^[3].

General Contact:

If cold meat and dairy touched one another: if they were moist, they require הם יאכלו יחד (see הם יאכלו יחד), and if they were dry then nothing need be done because nothing transferred from one to the other (אם לא יאכלו יחד). If הם יאכלו יחד were salted, in which case they would need הם יאכלו יחד (see הם יאכלו יחד).

Immersion:

If meat⁴ [assuming it was not salted enough to effect הם יאכלו יחד] was immersed in milk, there are multiple factors that can cause the meat to absorb milk to the point that הם יאכלו יחד will not be able to permit it, and there are multiple opinions as to which factors or combination thereof cause this absorption. The factors are:

- Roasting - the meat previously being roasted (or baked or cooked, see הם יאכלו יחד) makes it more absorptive according to some.
- Crevices - some meat has deep crevices into which the milk it is immersed in can seep and from which it can't be removed.
- Spicing - if the meat was heavily spiced, it can take on a level of הם יאכלו יחד the spice and become more absorptive.

The הם יאכלו יחד (אם לא יאכלו יחד) אם לא יאכלו יחד regarding these factors:

1. p. ?
 2. p. 60
 3. p. 59
 4. see Measurements, Surface Level, p. ?
 5. p. 25
 6. p. ?

1. The opinion of the $\hat{\alpha}^{\wedge}$, $\hat{\Omega}^{\wedge}\%è]U\hat{P}]B\hat{A} F\hat{+}R \acute{e}^{\wedge}\%è]\cdot\acute{Y}$, the $\hat{\alpha}^{\wedge}\dots\hat{D}^{\wedge}\hat{\alpha}'\hat{A} F\hat{+}R \emptyset]U\grave{e}$, the $]\hat{a}\hat{\Omega}^{\wedge}\dots\hat{U}^{\wedge}]]\hat{A}\hat{A} \acute{\alpha}B \div F\hat{+}V$ milk penetrates the surface to the depth of a $\hat{u}\hat{U}]\cdot\hat{a}]B\hat{A}$ meat had crevices or was heavily spiced, even if it was raw, the milk penetrates deep into the meat and prohibits it entirely.
2. The $\hat{\alpha}^{\wedge}\dots\hat{D}]\%Ó$, the $\hat{\alpha}^{\wedge}\dots\hat{e}]\%Đ$, and $\hat{\alpha}^{\wedge},\%ß$ (and possibly $\hat{\alpha}^{\wedge}\dots\hat{e}^{\wedge}]]^{\wedge}\hat{6}^{\wedge} F\hat{+} B \&\grave{o} 7F\text{--}\acute{\alpha}r \acute{A}\ddot{o}\acute{\alpha}R \dagger 2 \acute{\alpha}\grave{o} V^{\wedge}\text{fect}$, a meat would just need $]\hat{E}\acute{O}]\hat{u}\hat{\Omega}$ like any other ~~castro~~^[2], and hot roasted meat would require $\hat{\alpha}^{\wedge}\hat{u}\hat{U}]\cdot\hat{a}]B\hat{A}$ like any case of hot into cold^[3]. If the roasted meat had crevices or was heavily spiced and was hot[^][it seems that according to this opinion that if even roasted meat was cold, crevices and spicing would not be an issue.], it is entirely prohibited.
3. The $]\hat{\Omega}^{\wedge}$, $\hat{\Omega}^{\wedge}\dots\hat{\Omega}^{\wedge}\hat{A} F\hat{+}R \hat{P}^{\wedge}\dots\acute{O}]\hat{\mu}\hat{U}] \acute{e}]\hat{\Omega} \hat{P}]\hat{E}\grave{e}^{\wedge}2\hat{A} F\hat{+}R \acute{a}]\hat{a}\%ç$, and many others agree that roasting alone say that so long as the meat is roasted, even if it's cold, crevices and spicing would cause it to absorb the milk and become $]\hat{a}]\hat{U}\grave{e}$.

The $\hat{\alpha}^{\wedge}\hat{\Omega}^{\wedge}\hat{\alpha}^{\wedge}\dots\hat{\alpha}]\%Ö$) rules like the second opinion, though the $\hat{\alpha}^{\wedge}\dots\hat{P}^{\wedge}]]\dots\hat{e}]\hat{\Omega}^{\wedge}\hat{6} \text{--}2 \nu R \hat{6}\dagger\div V\acute{A}B \&R 7G\&\text{--}\acute{\alpha}v$ opinion that even cold roasted needs $\hat{\alpha}^{\wedge}\hat{u}\hat{U}]\cdot\hat{a}]B\hat{A} V\acute{\alpha}\acute{A}W72 F\ddot{o}\text{--}\acute{\alpha}r \hat{6}\grave{o} \nu\text{--}\acute{A}\hat{A} \&W7V\grave{C}B \text{--}\hat{a} \hat{6}\text{--}\nu\acute{\alpha}\text{--}\grave{icant} \text{financi}$ $]\hat{a}\grave{e}]\hat{U}\hat{N}]\hat{B}\cdot\hat{a}\hat{\mu}F\hat{+}R \grave{e}]\hat{a}\%Đ$ also says to be lenient ~~in the case of cold roasted meat~~^[4] according to the $\hat{\alpha}^{\wedge}\dots\hat{P}^{\wedge}]]\hat{A} \text{--}\hat{b} \hat{6}\ddot{o}\acute{A}B$ roasted meat that is $]\hat{a}\hat{U}]\cdot\times]\hat{A}\acute{\alpha}]\hat{A}\hat{U}$ and its $\hat{\alpha}^{\wedge}\hat{u}\hat{U}]\cdot\hat{a}]B V \acute{A}\text{--}\grave{ies}$ as $]\hat{E}\grave{a}^{\wedge} \acute{O}]\hat{a}\grave{e}]\hat{U}\hat{N}]\hat{B} fV\acute{A}\hat{A} \text{--}\grave{ç}F\grave{o} \ddot{O}\text{--}\acute{A}^2\hat{A} W\&$ leniencies: not considering the meat to be salted to the level of $]\hat{a}\hat{U}]\cdot\times]\hat{\mu}\grave{e}]\hat{U}\hat{e}]\hat{r} \acute{\alpha}B \acute{\alpha}\div B \&W V\text{--}\&\text{--}\acute{\alpha}r \grave{ç}]\hat{A}\hat{U}\hat{A}$ roasted meat that fell into milk, and we don't permit combined $]\hat{E}\grave{a}^{\wedge} \acute{O}]\hat{a}\grave{e}]\hat{U}\hat{N}]\hat{B} \acute{A}V\acute{\alpha}\text{--}V\acute{\alpha}6\text{--}W2 \dots\emptyset]\hat{b} \acute{e}]\hat{\Omega} \acute{a}^{\wedge}$ hesitant to be lenient even $]\hat{\Omega}^{\wedge}\acute{E}\acute{a}]\hat{2} \hat{P}^{\wedge}\dots\hat{\Omega}]\hat{\Omega}$, because there are so many $\hat{\alpha}^{\wedge}\dots\hat{D}^{\wedge}\hat{\alpha}]\cdot\acute{Y}$ who are stringent.

Even according to the opinions that cold roasted meat absorbs milk and becomes prohibited, we do not assume that the meat exudes any flavor back in to the milk, and so the milk remains permitted ($\hat{\alpha}^{\wedge}\%Ú \hat{\alpha}^{\wedge}\acute{Y} \wedge \%ç]\hat{\mu}\hat{\Omega}$).

Dehydrated Meat:

1. see Measurements, $]\hat{\mu}\acute{O}]\cdot\grave{ç}]\hat{A}\hat{U}\hat{A}\hat{E}\hat{\Omega}$, p. ?

2. p. ?

3. p. 22

4. see $]\hat{a}\hat{U}]\cdot\times]\hat{B}\hat{A} \hat{P}]\hat{A}\hat{U}]\hat{r} \hat{U}^{\wedge}\acute{e}\hat{U}]\cdot\hat{A} \hat{a} \hat{\delta}$

One of the methods used to make cheese is to place a piece of the stomach in the milk, so that the stomach enzymes cause the milk to curdle. This would normally be prohibited as the combination of meat (the stomach) and milk, and if the resulting cheese contains a detectable flavor of meat, the cheese would be prohibited (حَلَالٌ).^[1] However, even though it is a *halal* item, the stomach is not intrinsically prohibited, it's just its combination with milk that is prohibited.^[2]

The ^...P"] , ä)c¥Ü) proposes a solution to this problem wherein one could dehydrate the stomach until it is so dry that it's "like wood and has no moisture of meat." Such flesh can be used to make cheese, as the dry enzymes will still have an effect but there will be no flavor of meat transferred into the milk.

The $\wedge^{\vee}\% \dot{U} (\wedge^{\bullet}\dot{Y} \wedge^{\%}\dot{J} \dot{A} \dot{O})$ argues on the $\wedge^{\dots}b^{\vee}] \ \mathfrak{a}B \ 6 \text{---} 2 \ F \dagger \ B \ \ddot{o} \mathfrak{a}R \ \ddot{O} \ ' \ \mathfrak{a} \div B \text{---} \zeta FV \zeta F \text{---} \ddot{o} \mathfrak{a} \ \mathfrak{A} \zeta \ ' \ W6R \ FV \epsilon ydr$ curdle cheese, although he agrees that if it was used the resulting cheese would be permitted.

He adds that the same dehydration process would also remove the ability to impart flavor from the other intestines.

Meat:

Meat is the flesh of a living creature, of which there are five categories as far as the laws of ḥalakhah are concerned.

Domesticated Animal (] Ô]åÔ):

In the context of] Ê^, Ñ]uÜ] Â öæÇ' F†R ÖV B öb °osher domesticated animal (] Ê]âÔ]...Ô]Uè]B' —2 &† mentioned unqualified, this is what meat refers to. The meat of a non-kosher] Ê]âÔ is addressed.

Blood:

1. see $\wedge \forall \hat{a} \wedge \dots \tilde{O}] \tilde{O} \wedge \phi \hat{A} \mathbb{P} \wedge \% \mathbb{P}] \cdot \acute{O}$, p. ?

2. see $\hat{Y}^{\wedge} \dots \tilde{O}] \tilde{O}^{\wedge} \hat{A} \text{ sf} V_{cc2} \hat{A} \hat{a} \hat{o}$

3. p. ?

Blood, although it is prohibited to be consumed^[1], is not included in the laws of *basar b'chalav* and is therefore permitted to be cooked with milk and such a mixture is permitted to be benefitted from. (אֵין בְּחֵלֶב אֵשׁ דָּם) There is a debate whether cooked blood is (אֵין בְּחֵלֶב אֵשׁ דָּם) or is not (אֵין בְּחֵלֶב אֵשׁ דָּם) prohibition against consuming blood. According to those who permit cooked blood, blood is included in *basar b'chalav*. Therefore, everyone agrees that it's prohibited to consume blood cooked with milk, either because cooked blood is prohibited or because it is included in *basar b'chalav*.

Fetus (אֵין בְּחֵלֶב אֵשׁ דָּם):

A fetus found in a properly slaughtered domesticated animal is considered full-fledged meat and so has the same laws as a normal domesticated animal^[4].

Amniotic Sac (אֵין בְּחֵלֶב אֵשׁ דָּם):

an amniotic sac^[5] is excluded from the laws of *basar b'chalav*^[6].

Quasi-Edible Parts:

The following is a list of animal parts that are only quasi-edible and are therefore not considered to be meat. *Basar b'chalav* is still prohibited. [The *basar b'chalav* as interpreted by the *Shulchan Aruch* prohibition is just for eating, while others argue and say its even for cooking.] (אֵין בְּחֵלֶב אֵשׁ דָּם):

- The soft roots of the hooves

Undomesticated Animal (|uÜ|B“

The meat of a [uŮ]B —2 6öç6—7FVçFC' w&÷WBvdsW1, and FtoBlörres their laws.

Bird (^%Ö^2“

Birds are permitted (אֲרֵיבָּרִיתִּים) and are treated as meat (בְּשָׂרָה) and are thus to be eaten with milk (even of a פֶּתִיחָה) such, it is permitted to be cooked with milk and for the product of such cooking to be benefitted from. Whether such cooking is actually allowed in practice or is prohibited because of אֲרֵיבָּרִיתִּים — 2 F — 7 WFVB " F†R ...ä"]b á"r Ô)], %Ö and the (••Ý ^ % explicitly that it's prohibited, while the ^' %Ú says that there is no אֲרֵיבָּרִיתִּים at all, so obviously he would hold that to cook bird meat with milk is permitted. Unless otherwise specified, when chicken is mentioned in these laws, all kosher birds are included, chicken is just a common example.

Eggs:

Eggs that have been laid are permitted to be combined with meat or milk. If they have not yet been laid and were found within a slaughtered chicken, whether they are considered part of the mother, and therefore forbidden to be combined with milk, or like laid eggs that can be combined with milk, depends on what stage of development they have reached.

1. p. ?

2. p. ?

3. see] Û^•Õ]Â Ò 6öö¶-ærÂ &Csf Â â ð

The Development of Chicken Eggs Within the Mother:

Chickens that are in their egg-laying state (which they are now kept in permanently, by artificial means, so they produce eggs every day) have multiple eggs at various stages of development within them at a given time, each roughly a day ahead of the next. They start as yolks attached by a veiny membrane to the ovary where they grow. When the yolk has grown to full size, the membrane splits, releasing the yolk. The yolk then moves to the next stage where it is surrounded by the white, then a membrane, then the shell.

At What Stage of Development is an Egg Considered an Independent Entity:

The $\hat{\bullet}\hat{\text{O}}^{\wedge}$...ä]cŸÔ) says that once the egg has a white, it is considered an independent entity and is permitted to be combined with milk. This would even be true in a scenario where, instead of splitting and releasing the yolk, the membrane detached and remained surrounding the yolk beneath the white. If the egg has not yet developed a white, it is considered meat and cannot be combined with milk. Eating such an egg (so long as the yolk is fully developed) does not, however, require the eater to wait before eating dairy. The $\hat{\wedge}'\% \hat{\text{U}} (\hat{\bullet}\hat{\text{Y}}^{\wedge} \% \zeta]\hat{\bullet}\hat{\text{N}})$ says this is true even if the veiny membrane is still on the yolk.

The $] , \% \hat{\text{O}} (\hat{\bullet}\hat{\text{Y}}^{\wedge} \% \zeta]\text{R}' 6 \text{---} 2 \text{F} \dagger \text{B} \text{F} \dagger \text{R}$ pomen have a custom to treat even a fully completed egg with a shell to be considered meat if it was found within a slaughtered chicken, and this custom should be followed. However, he says that if the egg was already combined with milk, as long as it has developed the membrane found beneath the shell, it would be permitted. The $\hat{\wedge}'\% \hat{\text{U}} (\hat{\bullet}\hat{\text{Y}}^{\wedge} \% \zeta]' \dagger \hat{\text{ö}} \hat{\text{E}} \text{G} 2 \text{F} \dagger \text{B}$ even if the egg has developed the membrane around the white, it still cannot be combined with milk. However, if it has already been combined with milk the mixture is permitted to be eaten, so long as the egg has developed a white and the veiny membrane is not still around the yolk. That said, if prohibiting the mixture would result in a large financial loss, we can rely on those who hold that an egg is permitted to be combined with milk so long as the egg yolk has completely developed, even if it is surrounded by the veiny membrane.

Fish (150):

Grasshopper (juò) “

Grasshoppers are like fish^[3] in that they are $\text{[j\^a\^a]\^{\bullet}\^{\zeta}\^{\wedge}, \^{\circ}\^{\wedge}\text{[5\^U]\^{\circ}} \text{ W\^{\&}\^{\circ}\text{---GFVB F\^{\circ} \^{\&}\^{\&}\^{\circ} V FV\^{\wedge} v\text{---F, V\text{---F}\^{\dagger}\^{\wedge}W'' \^{\circ}\^{\wedge}$ but differ from fish in that there is no $\text{\^{\wedge} \^{\wedge}\^{\circ}\^{\wedge} \^{\circ}}$ concern associated with their combination with either meat or milk.

Milk:

]5Đ]Uè]•Ù^¥Đ:

The only milk that is prohibited under the laws of ḥalakhah is that of a kosher animal . Therefore, derivatives, some retain their status of milk and so are included $\text{in the laws of } \text{ḥalakhah}$ and $\text{are not considered as } \text{ḥalakhah}$ have lost their milk status.

Whey:

1. p. ?

2. https://ohr.edu/ask_db/ask_main.php/19/Q1/

3. p. 32

Whey is a by-product of the cheese-making process. Rennet is introduced to milk, which causes the formation of curds from the fat of the milk. Those curds are then removed and processed further into cheese. The "milk" left behind is called whey.

The $\text{^{\dots}\text{D}^{\wedge} \dots \text{O}]\text{U}\text{N}]\text{ N}]\dots\text{O}^{\wedge}, \text{ä}]\text{c}\text{V}\text{x})$ says that whey retains its milk status and is forbidden to be combined with

The][P^...D uses this ~~same milk~~ wording to exclude and the milk of a non-kosher animal^[3].

Rennet:

Rennet is milk found in the belly of a nursing calf. It contains enzymes from the stomach lining which make it a crucial component of the cheesemaking process.

1. <https://www.hebrewbooks.org/shas.aspx?mesechta=31&daf=113b&format=pdf>

2. p. 35

3. p. 36

According to most opinions, when it is found congealed in the stomach it is not considered to be milk, rather it is considered a waste product. It can therefore be combined with meat (אֶלֶּם אֲשֶׁר יִמָּצֵא בִּלְבָב הַבְּרִיָּה מְקֻיָּם וְנִמְצָא בְּעֵת הַשְּׁחִיטָה כְּעֵשׂ בְּלִי חֵלֶב וְנִמְצָא בְּעֵת הַשְּׁחִיטָה כְּעֵשׂ בְּלִי חֵלֶב וְנִמְצָא בְּעֵת הַשְּׁחִיטָה כְּעֵשׂ בְּלִי חֵלֶב). The רמב"ם (רמב"ם) adds that although congealed rennet is technically permitted to be combined with meat, one should not intentionally do so because of פסול.

Even when the rennet is found in a fluid state, the [a×] è says it is not milk, but cites an opinion that it is considered milk and cannot be combined with meat. The ^...Đ"] 6öæ7W'2 v—F, F†—2 7G&—ævVçB ÷ —æ— (Λ•Ö"^^" é]Ò•

Rennet In Cheesemaking:

Rennet that has sat in the stomach of the animal for 24 hours post-slaughter is considered to have been soaked^[2] with it and is therefore prohibited to be used to make cheese, as the $\text{J } \ddot{\text{U}} \text{ } \hat{\text{a}} \text{U} \hat{\text{e}}$ of meat it absorbed from the stomach will be mixed in to the cheese. The same would apply if the stomach was salted before the rennet was removed. ($\text{ } \hat{\text{a}} \text{ } \ddot{\text{O}} \text{ } \text{ } \hat{\text{a}} \text{ } \text{c} \text{ } \ddot{\text{U}}$)

The ^...P"] ...é]Ò' FG2 F† B öæR 6†÷VÆB æ÷B Pven allow the rennet to remain in the stomach long enough the stomach to cool down to room temperature, but if one did wait that long the rennet is not prohibited.

If rennet that was left in the stomach for 24 hours was used to make cheese, the status of the cheese depends on the state of the rennet (^...p"] é]Ò“

1. see]âè] ê ^%Ù]òÂ fC# rÂ â ð

2. p. 25

1. **The Rennet Was Fluid:** If the rennet was fluid then the cheese is prohibited unless the quantity of milk used to make it was 60 times greater than the quantity of rennet used.^[1]
2. **The Rennet Was Found Congealed:** If the rennet was found congealed in the stomach it is considered waste and therefore even the meat flavor it absorbed is considered to be waste. Because of this, the cheese made with it is not prohibited.
3. **The Rennet Was Found As A Fluid But Later Congealed:** The primarily accepted opinion is to treat such rennet as fluid and therefore prohibit cheese made therewith. There are, however, opinions who treat such rennet as congealed, therefore in a case where prohibiting the cheese will constitute a significant loss we are lenient and permit the cheese.

Male Milk:

The milk of a male animal that has a genetic abnormality which causes the animal to have

udders (see ¹...²) is included in the prohibition. ³ is included in the prohibition.

There are various "milks" that are prohibited due to ¹ however the specifics of that prohibition is different for each:

Almond Milk:

1. see ¹...² ³ ⁴ ⁵ ⁶ ⁷ ⁸ ⁹ ¹⁰ ¹¹ ¹² ¹³ ¹⁴ ¹⁵ ¹⁶ ¹⁷ ¹⁸ ¹⁹ ²⁰ ²¹ ²² ²³ ²⁴ ²⁵ ²⁶ ²⁷ ²⁸ ²⁹ ³⁰ ³¹ ³² ³³ ³⁴ ³⁵ ³⁶ ³⁷ ³⁸ ³⁹ ⁴⁰ ⁴¹ ⁴² ⁴³ ⁴⁴ ⁴⁵ ⁴⁶ ⁴⁷ ⁴⁸ ⁴⁹ ⁵⁰ ⁵¹ ⁵² ⁵³ ⁵⁴ ⁵⁵ ⁵⁶ ⁵⁷ ⁵⁸ ⁵⁹ ⁶⁰ ⁶¹ ⁶² ⁶³ ⁶⁴ ⁶⁵ ⁶⁶ ⁶⁷ ⁶⁸ ⁶⁹ ⁷⁰ ⁷¹ ⁷² ⁷³ ⁷⁴ ⁷⁵ ⁷⁶ ⁷⁷ ⁷⁸ ⁷⁹ ⁸⁰ ⁸¹ ⁸² ⁸³ ⁸⁴ ⁸⁵ ⁸⁶ ⁸⁷ ⁸⁸ ⁸⁹ ⁹⁰ ⁹¹ ⁹² ⁹³ ⁹⁴ ⁹⁵ ⁹⁶ ⁹⁷ ⁹⁸ ⁹⁹ ¹⁰⁰ ¹⁰¹ ¹⁰² ¹⁰³ ¹⁰⁴ ¹⁰⁵ ¹⁰⁶ ¹⁰⁷ ¹⁰⁸ ¹⁰⁹ ¹¹⁰ ¹¹¹ ¹¹² ¹¹³ ¹¹⁴ ¹¹⁵ ¹¹⁶ ¹¹⁷ ¹¹⁸ ¹¹⁹ ¹²⁰ ¹²¹ ¹²² ¹²³ ¹²⁴ ¹²⁵ ¹²⁶ ¹²⁷ ¹²⁸ ¹²⁹ ¹³⁰ ¹³¹ ¹³² ¹³³ ¹³⁴ ¹³⁵ ¹³⁶ ¹³⁷ ¹³⁸ ¹³⁹ ¹⁴⁰ ¹⁴¹ ¹⁴² ¹⁴³ ¹⁴⁴ ¹⁴⁵ ¹⁴⁶ ¹⁴⁷ ¹⁴⁸ ¹⁴⁹ ¹⁵⁰ ¹⁵¹ ¹⁵² ¹⁵³ ¹⁵⁴ ¹⁵⁵ ¹⁵⁶ ¹⁵⁷ ¹⁵⁸ ¹⁵⁹ ¹⁶⁰ ¹⁶¹ ¹⁶² ¹⁶³ ¹⁶⁴ ¹⁶⁵ ¹⁶⁶ ¹⁶⁷ ¹⁶⁸ ¹⁶⁹ ¹⁷⁰ ¹⁷¹ ¹⁷² ¹⁷³ ¹⁷⁴ ¹⁷⁵ ¹⁷⁶ ¹⁷⁷ ¹⁷⁸ ¹⁷⁹ ¹⁸⁰ ¹⁸¹ ¹⁸² ¹⁸³ ¹⁸⁴ ¹⁸⁵ ¹⁸⁶ ¹⁸⁷ ¹⁸⁸ ¹⁸⁹ ¹⁹⁰ ¹⁹¹ ¹⁹² ¹⁹³ ¹⁹⁴ ¹⁹⁵ ¹⁹⁶ ¹⁹⁷ ¹⁹⁸ ¹⁹⁹ ²⁰⁰ ²⁰¹ ²⁰² ²⁰³ ²⁰⁴ ²⁰⁵ ²⁰⁶ ²⁰⁷ ²⁰⁸ ²⁰⁹ ²¹⁰ ²¹¹ ²¹² ²¹³ ²¹⁴ ²¹⁵ ²¹⁶ ²¹⁷ ²¹⁸ ²¹⁹ ²²⁰ ²²¹ ²²² ²²³ ²²⁴ ²²⁵ ²²⁶ ²²⁷ ²²⁸ ²²⁹ ²³⁰ ²³¹ ²³² ²³³ ²³⁴ ²³⁵ ²³⁶ ²³⁷ ²³⁸ ²³⁹ ²⁴⁰ ²⁴¹ ²⁴² ²⁴³ ²⁴⁴ ²⁴⁵ ²⁴⁶ ²⁴⁷ ²⁴⁸ ²⁴⁹ ²⁵⁰ ²⁵¹ ²⁵² ²⁵³ ²⁵⁴ ²⁵⁵ ²⁵⁶ ²⁵⁷ ²⁵⁸ ²⁵⁹ ²⁶⁰ ²⁶¹ ²⁶² ²⁶³ ²⁶⁴ ²⁶⁵ ²⁶⁶ ²⁶⁷ ²⁶⁸ ²⁶⁹ ²⁷⁰ ²⁷¹ ²⁷² ²⁷³ ²⁷⁴ ²⁷⁵ ²⁷⁶ ²⁷⁷ ²⁷⁸ ²⁷⁹ ²⁸⁰ ²⁸¹ ²⁸² ²⁸³ ²⁸⁴ ²⁸⁵ ²⁸⁶ ²⁸⁷ ²⁸⁸ ²⁸⁹ ²⁹⁰ ²⁹¹ ²⁹² ²⁹³ ²⁹⁴ ²⁹⁵ ²⁹⁶ ²⁹⁷ ²⁹⁸ ²⁹⁹ ³⁰⁰ ³⁰¹ ³⁰² ³⁰³ ³⁰⁴ ³⁰⁵ ³⁰⁶ ³⁰⁷ ³⁰⁸ ³⁰⁹ ³¹⁰ ³¹¹ ³¹² ³¹³ ³¹⁴ ³¹⁵ ³¹⁶ ³¹⁷ ³¹⁸ ³¹⁹ ³²⁰ ³²¹ ³²² ³²³ ³²⁴ ³²⁵ ³²⁶ ³²⁷ ³²⁸ ³²⁹ ³³⁰ ³³¹ ³³² ³³³ ³³⁴ ³³⁵ ³³⁶ ³³⁷ ³³⁸ ³³⁹ ³⁴⁰ ³⁴¹ ³⁴² ³⁴³ ³⁴⁴ ³⁴⁵ ³⁴⁶ ³⁴⁷ ³⁴⁸ ³⁴⁹ ³⁵⁰ ³⁵¹ ³⁵² ³⁵³ ³⁵⁴ ³⁵⁵ ³⁵⁶ ³⁵⁷ ³⁵⁸ ³⁵⁹ ³⁶⁰ ³⁶¹ ³⁶² ³⁶³ ³⁶⁴ ³⁶⁵ ³⁶⁶ ³⁶⁷ ³⁶⁸ ³⁶⁹ ³⁷⁰ ³⁷¹ ³⁷² ³⁷³ ³⁷⁴ ³⁷⁵ ³⁷⁶ ³⁷⁷ ³⁷⁸ ³⁷⁹ ³⁸⁰ ³⁸¹ ³⁸² ³⁸³ ³⁸⁴ ³⁸⁵ ³⁸⁶ ³⁸⁷ ³⁸⁸ ³⁸⁹ ³⁹⁰ ³⁹¹ ³⁹² ³⁹³ ³⁹⁴ ³⁹⁵ ³⁹⁶ ³⁹⁷ ³⁹⁸ ³⁹⁹ ⁴⁰⁰ ⁴⁰¹ ⁴⁰² ⁴⁰³ ⁴⁰⁴ ⁴⁰⁵ ⁴⁰⁶ ⁴⁰⁷ ⁴⁰⁸ ⁴⁰⁹ ⁴¹⁰ ⁴¹¹ ⁴¹² ⁴¹³ ⁴¹⁴ ⁴¹⁵ ⁴¹⁶ ⁴¹⁷ ⁴¹⁸ ⁴¹⁹ ⁴²⁰ ⁴²¹ ⁴²² ⁴²³ ⁴²⁴ ⁴²⁵ ⁴²⁶ ⁴²⁷ ⁴²⁸ ⁴²⁹ ⁴³⁰ ⁴³¹ ⁴³² ⁴³³ ⁴³⁴ ⁴³⁵ ⁴³⁶ ⁴³⁷ ⁴³⁸ ⁴³⁹ ⁴⁴⁰ ⁴⁴¹ ⁴⁴² ⁴⁴³ ⁴⁴⁴ ⁴⁴⁵ ⁴⁴⁶ ⁴⁴⁷ ⁴⁴⁸ ⁴⁴⁹ ⁴⁵⁰ ⁴⁵¹ ⁴⁵² ⁴⁵³ ⁴⁵⁴ ⁴⁵⁵ ⁴⁵⁶ ⁴⁵⁷ ⁴⁵⁸ ⁴⁵⁹ ⁴⁶⁰ ⁴⁶¹ ⁴⁶² ⁴⁶³ ⁴⁶⁴ ⁴⁶⁵ ⁴⁶⁶ ⁴⁶⁷ ⁴⁶⁸ ⁴⁶⁹ ⁴⁷⁰ ⁴⁷¹ ⁴⁷² ⁴⁷³ ⁴⁷⁴ ⁴⁷⁵ ⁴⁷⁶ ⁴⁷⁷ ⁴⁷⁸ ⁴⁷⁹ ⁴⁸⁰ ⁴⁸¹ ⁴⁸² ⁴⁸³ ⁴⁸⁴ ⁴⁸⁵ ⁴⁸⁶ ⁴⁸⁷ ⁴⁸⁸ ⁴⁸⁹ ⁴⁹⁰ ⁴⁹¹ ⁴⁹² ⁴⁹³ ⁴⁹⁴ ⁴⁹⁵ ⁴⁹⁶ ⁴⁹⁷ ⁴⁹⁸ ⁴⁹⁹ ⁵⁰⁰ ⁵⁰¹ ⁵⁰² ⁵⁰³ ⁵⁰⁴ ⁵⁰⁵ ⁵⁰⁶ ⁵⁰⁷ ⁵⁰⁸ ⁵⁰⁹ ⁵¹⁰ ⁵¹¹ ⁵¹² ⁵¹³ ⁵¹⁴ ⁵¹⁵ ⁵¹⁶ ⁵¹⁷ ⁵¹⁸ ⁵¹⁹ ⁵²⁰ ⁵²¹ ⁵²² ⁵²³ ⁵²⁴ ⁵²⁵ ⁵²⁶ ⁵²⁷ ⁵²⁸ ⁵²⁹ ⁵³⁰ ⁵³¹ ⁵³² ⁵³³ ⁵³⁴ ⁵³⁵ ⁵³⁶ ⁵³⁷ ⁵³⁸ ⁵³⁹ ⁵⁴⁰ ⁵⁴¹ ⁵⁴² ⁵⁴³ ⁵⁴⁴ ⁵⁴⁵ ⁵⁴⁶ ⁵⁴⁷ ⁵⁴⁸ ⁵⁴⁹ ⁵⁵⁰ ⁵⁵¹ ⁵⁵² ⁵⁵³ ⁵⁵⁴ ⁵⁵⁵ ⁵⁵⁶ ⁵⁵⁷ ⁵⁵⁸ ⁵⁵⁹ ⁵⁶⁰ ⁵⁶¹ ⁵⁶² ⁵⁶³ ⁵⁶⁴ ⁵⁶⁵ ⁵⁶⁶ ⁵⁶⁷ ⁵⁶⁸ ⁵⁶⁹ ⁵⁷⁰ ⁵⁷¹ ⁵⁷² ⁵⁷³ ⁵⁷⁴ ⁵⁷⁵ ⁵⁷⁶ ⁵⁷⁷ ⁵⁷⁸ ⁵⁷⁹ ⁵⁸⁰ ⁵⁸¹ ⁵⁸² ⁵⁸³ ⁵⁸⁴ ⁵⁸⁵ ⁵⁸⁶ ⁵⁸⁷ ⁵⁸⁸ ⁵⁸⁹ ⁵⁹⁰ ⁵⁹¹ ⁵⁹² ⁵⁹³ ⁵⁹⁴ ⁵⁹⁵ ⁵⁹⁶ ⁵⁹⁷ ⁵⁹⁸ ⁵⁹⁹ ⁶⁰⁰ ⁶⁰¹ ⁶⁰² ⁶⁰³ ⁶⁰⁴ ⁶⁰⁵ ⁶⁰⁶ ⁶⁰⁷ ⁶⁰⁸ ⁶⁰⁹ ⁶¹⁰ ⁶¹¹ ⁶¹² ⁶¹³ ⁶¹⁴ ⁶¹⁵ ⁶¹⁶ ⁶¹⁷ ⁶¹⁸ ⁶¹⁹ ⁶²⁰ ⁶²¹ ⁶²² ⁶²³ ⁶²⁴ ⁶²⁵ ⁶²⁶ ⁶²⁷ ⁶²⁸ ⁶²⁹ ⁶³⁰ ⁶³¹ ⁶³² ⁶³³ ⁶³⁴ ⁶³⁵ ⁶³⁶ ⁶³⁷ ⁶³⁸ ⁶³⁹ ⁶⁴⁰ ⁶⁴¹ ⁶⁴² ⁶⁴³ ⁶⁴⁴ ⁶⁴⁵ ⁶⁴⁶ ⁶⁴⁷ ⁶⁴⁸ ⁶⁴⁹ ⁶⁵⁰ ⁶⁵¹ ⁶⁵² ⁶⁵³ ⁶⁵⁴ ⁶⁵⁵ ⁶⁵⁶ ⁶⁵⁷ ⁶⁵⁸ ⁶⁵⁹ ⁶⁶⁰ ⁶⁶¹ ⁶⁶² ⁶⁶³ ⁶⁶⁴ ⁶⁶⁵ ⁶⁶⁶ ⁶⁶⁷ ⁶⁶⁸ ⁶⁶⁹ ⁶⁷⁰ ⁶⁷¹ ⁶⁷² ⁶⁷³ ⁶⁷⁴ ⁶⁷⁵ ⁶⁷⁶ ⁶⁷⁷ ⁶⁷⁸ ⁶⁷⁹ ⁶⁸⁰ ⁶⁸¹ ⁶⁸² ⁶⁸³ ⁶⁸⁴ ⁶⁸⁵ ⁶⁸⁶ ⁶⁸⁷ ⁶⁸⁸ ⁶⁸⁹ ⁶⁹⁰ ⁶⁹¹ ⁶⁹² ⁶⁹³ ⁶⁹⁴ ⁶⁹⁵ ⁶⁹⁶ ⁶⁹⁷ ⁶⁹⁸ ⁶⁹⁹ ⁷⁰⁰ ⁷⁰¹ ⁷⁰² ⁷⁰³ ⁷⁰⁴ ⁷⁰⁵ ⁷⁰⁶ ⁷⁰⁷ ⁷⁰⁸ ⁷⁰⁹ ⁷¹⁰ ⁷¹¹ ⁷¹² ⁷¹³ ⁷¹⁴ ⁷¹⁵ ⁷¹⁶ ⁷¹⁷ ⁷¹⁸ ⁷¹⁹ ⁷²⁰ ⁷²¹ ⁷²² ⁷²³ ⁷²⁴ ⁷²⁵ ⁷²⁶ ⁷²⁷ ⁷²⁸ ⁷²⁹ ⁷³⁰ ⁷³¹ ⁷³² ⁷³³ ⁷³⁴ ⁷³⁵ ⁷³⁶ ⁷³⁷ ⁷³⁸ ⁷³⁹ ⁷⁴⁰ ⁷⁴¹ ⁷⁴² ⁷⁴³ ⁷⁴⁴ ⁷⁴⁵ ⁷⁴⁶ ⁷⁴⁷ ⁷⁴⁸ ⁷⁴⁹ ⁷⁵⁰ ⁷⁵¹ ⁷⁵² ⁷⁵³ ⁷⁵⁴ ⁷⁵⁵ ⁷⁵⁶ ⁷⁵⁷ ⁷⁵⁸ ⁷⁵⁹ ⁷⁶⁰ ⁷⁶¹ ⁷⁶² ⁷⁶³ ⁷⁶⁴ ⁷⁶⁵ ⁷⁶⁶ ⁷⁶⁷ ⁷⁶⁸ ⁷⁶⁹ ⁷⁷⁰ ⁷⁷¹ ⁷⁷² ⁷⁷³ ⁷⁷⁴ ⁷⁷⁵ ⁷⁷⁶ ⁷⁷⁷ ⁷⁷⁸ ⁷⁷⁹ ⁷⁸⁰ ⁷⁸¹ ⁷⁸² ⁷⁸³ ⁷⁸⁴ ⁷⁸⁵ ⁷⁸⁶ ⁷⁸⁷ ⁷⁸⁸ ⁷⁸⁹ ⁷⁹⁰ ⁷⁹¹ ⁷⁹² ⁷⁹³ ⁷⁹⁴ ⁷⁹⁵ ⁷⁹⁶ ⁷⁹⁷ ⁷⁹⁸ ⁷⁹⁹ ⁸⁰⁰ ⁸⁰¹ ⁸⁰² ⁸⁰³ ⁸⁰⁴ ⁸⁰⁵ ⁸⁰⁶ ⁸⁰⁷ ⁸⁰⁸ ⁸⁰⁹ ⁸¹⁰ ⁸¹¹ ⁸¹² ⁸¹³ ⁸¹⁴ ⁸¹⁵ ⁸¹⁶ ⁸¹⁷ ⁸¹⁸ ⁸¹⁹ ⁸²⁰ ⁸²¹ ⁸²² ⁸²³ ⁸²⁴ ⁸²⁵ ⁸²⁶ ⁸²⁷ ⁸²⁸ ⁸²⁹ ⁸³⁰ ⁸³¹ ⁸³² ⁸³³ ⁸³⁴ ⁸³⁵ ⁸³⁶ ⁸³⁷ ⁸³⁸ ⁸³⁹ ⁸⁴⁰ ⁸⁴¹ ⁸⁴² ⁸⁴³ ⁸⁴⁴ ⁸⁴⁵ ⁸⁴⁶ ⁸⁴⁷ ⁸⁴⁸ ⁸⁴⁹ ⁸⁵⁰ ⁸⁵¹ ⁸⁵² ⁸⁵³ ⁸⁵⁴ ⁸⁵⁵ ⁸⁵⁶ ⁸⁵⁷ ⁸⁵⁸ ⁸⁵⁹ ⁸⁶⁰ ⁸⁶¹ ⁸⁶² ⁸⁶³ ⁸⁶⁴ ⁸⁶⁵ ⁸⁶⁶ ⁸⁶⁷ ⁸⁶⁸ ⁸⁶⁹ ⁸⁷⁰ ⁸⁷¹ ⁸⁷² ⁸⁷³ ⁸⁷⁴ ⁸⁷⁵ ⁸⁷⁶ ⁸⁷⁷ ⁸⁷⁸ ⁸⁷⁹ ⁸⁸⁰ ⁸⁸¹ ⁸⁸² ⁸⁸³ ⁸⁸⁴ ⁸⁸⁵ ⁸⁸⁶ ⁸⁸⁷ ⁸⁸⁸ ⁸⁸⁹ ⁸⁹⁰ ⁸⁹¹ ⁸⁹² ⁸⁹³ ⁸⁹⁴ ⁸⁹⁵ ⁸⁹⁶ ⁸⁹⁷ ⁸⁹⁸ ⁸⁹⁹ ⁹⁰⁰ ⁹⁰¹ ⁹⁰² ⁹⁰³ ⁹⁰⁴ ⁹⁰⁵ ⁹⁰⁶ ⁹⁰⁷ ⁹⁰⁸ ⁹⁰⁹ ⁹¹⁰ ⁹¹¹ ⁹¹² ⁹¹³ ⁹¹⁴ ⁹¹⁵ ⁹¹⁶ ⁹¹⁷ ⁹¹⁸ ⁹¹⁹ ⁹²⁰ ⁹²¹ ⁹²² ⁹²³ ⁹²⁴ ⁹²⁵ ⁹²⁶ ⁹²⁷ ⁹²⁸ ⁹²⁹ ⁹³⁰ ⁹³¹ ⁹³² ⁹³³ ⁹³⁴ ⁹³⁵ ⁹³⁶ ⁹³⁷ ⁹³⁸ ⁹³⁹ ⁹⁴⁰ ⁹⁴¹ ⁹⁴² ⁹⁴³ ⁹⁴⁴ ⁹⁴⁵ ⁹⁴⁶ ⁹⁴⁷ ⁹⁴⁸ ⁹⁴⁹ ⁹⁵⁰ ⁹⁵¹ ⁹⁵² ⁹⁵³ ⁹⁵⁴ ⁹⁵⁵ ⁹⁵⁶ ⁹⁵⁷ ⁹⁵⁸ ⁹⁵⁹ ⁹⁶⁰ ⁹⁶¹ ⁹⁶² ⁹⁶³ ⁹⁶⁴ ⁹⁶⁵ ⁹⁶⁶ ⁹⁶⁷ ⁹⁶⁸ ⁹⁶⁹ ⁹⁷⁰ ⁹⁷¹ ⁹⁷² ⁹⁷³ ⁹⁷⁴ ⁹⁷⁵ ⁹⁷⁶ ⁹⁷⁷ ⁹⁷⁸ ⁹⁷⁹ ⁹⁸⁰ ⁹⁸¹ ⁹⁸² ⁹⁸³ ⁹⁸⁴ ⁹⁸⁵ ⁹⁸⁶ ⁹⁸⁷ ⁹⁸⁸ ⁹⁸⁹ ⁹⁹⁰ ⁹⁹¹ ⁹⁹² ⁹⁹³ ⁹⁹⁴ ⁹⁹⁵ ⁹⁹⁶ ⁹⁹⁷ ⁹⁹⁸ ⁹⁹⁹ ¹⁰⁰⁰

3. p. ?

Almond milk, while not truly milk at all, has enough of an appearance of milk that the $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ requires meat combined with almond milk to be served with almonds (or some other indicator) nearby to show that the "milk" is not truly milk. The $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ extends this to include chicken with almond milk, but he holds that if you don't have almonds, you can still eat the chicken ($\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ "the meat" $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ "The $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ "however, disagrees with this $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ based on a $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ an indicator it would be prohibited to eat even a mixture of *chicken* and almond milk. The $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ adds that chicken with almond milk would only require an indicator if it was served at a large meal, where there would be a real concern of $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ but in a private setting an indicator would not be required. R' Yitzchok Dov Lefkowitz told me in the name of R' Heinneman that since non-dairy "milks" have become so widespread, there is no longer an issue of $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ & $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ er that sees a mixture of meat and a milk alternative will assume that it's not real milk. Because of this, the Star-K allows restaurants under its supervision to serve non-dairy milk in an unmarked metal container, as opposed to their old policy of requiring the milk to be brought out in its original container that clearly says "almond milk."

Mother's Milk:

Human breast milk, while it is both a true milk and permitted to be consumed even by adults (once it has been separated from its source), is not included in the laws of $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ however it is prohibited (at least with meat, see the discussion of almond milk regarding combinations with chicken^[1]) under the laws of $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ almond milk, there is no solution available of placing an indicator next to the dish. However such milk is nullified in a simple majority so long as it cannot be seen in the dish. ($\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$)

Human Male Milk:

In the event of an abnormality which causes a man to produce milk, it would share the laws of mother's milk. ($\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$ as explained by the $\text{לֹא יִשְׁתַּיֵּן בְּחֵלֶב אֵשׁ}$)

Milk of a Non-Kosher Animal:

1. p. ?

The milk of a non-kosher animal is not prohibited under the laws of $\text{] } \acute{e}^{\wedge}, \tilde{N} \text{]u} \ddot{U} \text{] } \text{F} \grave{o} \text{ \&R } \ddot{o} \ddot{O} \& - \text{æ} \text{VB } \text{v} - \text{F}, \ddot{O} \text{V}$
^[1] Of course such a combination (or the reverse, non-kosher meat with kosher milk) is forbidden
 to be eaten, but that is just because the milk was already prohibited to be eaten as the milk of a
 non-kosher animal. It is, however, permitted to cook and benefit from such a mixture ($\wedge \bullet \ddot{O}^{\wedge} \text{"^"} \ddot{a} \text{]c} \text{¥} \ddot{O}$). The $\wedge \dots \text{P}^{\wedge}$
 $(\wedge \bullet \acute{Y} \wedge \hat{a} \text{]}\bullet \tilde{a} \text{]2' } 6 - 2 \text{ F} \dagger \text{ B} - \text{B} - 2 \text{ f} \div \& \& - \text{FFV} \hat{a} \text{ F} \grave{o} \text{ } \ddot{6} \ddot{o} \ddot{2} \text{ 7V6}, \ddot{O} - \ddot{z} \text{GW} \& \text{R} \& \text{V6 W6R} \ddot{o} \text{b } \text{P}^{\wedge} \dots \text{D}^{\wedge} \text{¢ } \hat{a} \text{]}\bullet \beta$, alth
 to chicken/non-kosher milk. The $\text{] , \% } \ddot{O} (\wedge \bullet \acute{Y} \wedge \% \text{ç } \text{]B' } \ddot{6} \ddot{o} \text{ç6} - \text{FW'2 F} \dagger \text{R } \grave{e} \text{]}\grave{a} \text{D}$'s reasoning to be flawed but is hesit
 permit that which the $\wedge \dots \text{P} \text{] } \& \ddot{o} \dagger - \& - \text{G2} \hat{a}$ The $\wedge^{\wedge} \% \acute{U}$, omits that cooking cannot be
 prohibited as $\text{]}\grave{a} \text{e} \text{] } \acute{e} \text{ } \text{¥} \% \text{ç} \text{]}\text{c} \text{B} \text{f} \text{A}$ agrees with the $\wedge \dots \text{P}^{\wedge} \text{] } \text{æB } \text{W} \& \ddot{O} - \text{G2 7V6}, \ddot{6} \ddot{o} \text{¥} - \text{æ} \text{r} \grave{a}$

When Sliced With a Knife:

1. see Measurements,]µÓ]’ ç]ÄÛ^EÔ, p. ?

Sharp Foods (יֵשׁוּבִים, יֵשׁוּבִים...יֵשׁוּבִים)

Sharp foods, either intrinsically sharp foods like radish and beets or mixtures consisting of at

least a majority sharp foods (יֵשׁוּבִים...יֵשׁוּבִים) have special laws when it comes to the transfer of] יֵשׁוּבִים[

When Sliced With a Knife:

Slicing sharp foods, such as radishes, with a knife (even if it's cold and clean) causes the knife

to expel the] יֵשׁוּבִים[that it contains into the place of contact with the knife into the radish (יֵשׁוּבִים...יֵשׁוּבִים) 'א

This expulsion of] יֵשׁוּבִים[, which normally requires heat, is effected by the combination of the pressure exerted by the knife against the food and the sharp flavor of the food (יֵשׁוּבִים...יֵשׁוּבִים) 'א

Consequently, if the knife contained was used for hot meat within 24 hours, or even if it was

used more than 24 hours earlier but it still had meat residue on the surface, the radish would not

be able to be eaten with dairy until it had a יֵשׁוּבִים & VÖðved, or if he tasted the radish and was unable to detect flavor of meat, at which point it can just be rinsed^[2] (יֵשׁוּבִים...יֵשׁוּבִים) 'א

The יֵשׁוּבִים 'א & æw2 â ÷ æöâ F† B Pven if the knife was clean and had only been used for hot meat

more than 24 hours earlier the radish will still need to have a יֵשׁוּבִים & VÖðved before it can be

combined with dairy. This is because the sharpness of the radish reinvigorates the flavor (יֵשׁוּבִים...יֵשׁוּבִים) like] יֵשׁוּבִים[FöW2 ...é"]ç é]Ö á"r Ö).

The יֵשׁוּבִים 6öçF-çVW2 F† B -b öæR F-fâwB & VÖðve the יֵשׁוּבִים æB 6öð°ed the radish with dairy, if the contents of the pot is greater than 60 times the יֵשׁוּבִים ÷" F†R &Æ FR öb F†R ¶æ-fRÂ v†-6†Pver is

The $\hat{\bullet}\tilde{O}''^{\wedge}$ $V_{\text{æG2}}$ ö`f that the above would all be true for a knife that contains $\int \ddot{U} \cdot \hat{a} \int U \hat{e}$ of $\int \hat{U}^{\wedge} \tilde{O}^{\wedge}$, $2 \nu V_{\text{ÆÄ}}$ says that we, who argue on the $\hat{\bullet}\tilde{O}''^{\wedge}$ $\text{æB} \dagger \ddot{o} \text{ÆB} \text{F} \dagger \text{B} \times^{\wedge} \% \hat{a}$ applies to all prohibitions, $\int \tilde{N}'' \int p$ even if the blade was smaller than the $\hat{\emptyset} \int \ddot{U} \int B \hat{A} -b \text{F} \dagger \text{R} \& \text{F} -6$, νW_{G2} $\ddot{O} - \text{æ}$ ed with permitted food, one would need 60 times the $\hat{\emptyset} \int \ddot{U} \int B \hat{A} \& V_6 W_6 \text{R} \nu \dagger V \hat{a} \text{F} \dagger \text{R} \& \text{F} -6$, pas sliced the $\int \ddot{U} \cdot \hat{a} \int U \hat{e}$ of $\int \hat{U}^{\wedge} \tilde{O}^{\wedge}$, $\& \ddot{o} \dagger - \& - \text{FV}$ The $\hat{\dots} \text{P}'' \int \dots \acute{e} \int \ddot{O}' \text{FG2} \text{F} \dagger \text{B} -b \text{F} \dagger \text{R} \& \text{F} -6$, pas diced (so each piece is only the size of a $\hat{\emptyset} \int \ddot{U} \int B \hat{A} \text{F} \dagger V \hat{a}$ need 60 times the whole radish. The $\hat{\wedge}' \% \acute{U}$ ($\hat{\wedge}' \acute{Y}$) elaborates:

- If the knife contained flavor of meat/milk, the above would only be true if the blade had a greater volume than the radish, so there would be enough $\int \ddot{U} \cdot \hat{a} \int U \hat{e}$ in the knife to permeate all of the radish. Otherwise, if one cooked the whole radish with dairy, one would only need 60 times the blade. If we no longer have access to the knife and we don't know its volume, we assume that it had a greater volume than the radish. If one combined a piece of the radish with dairy, we have to assume that the piece was fully permeated with meat flavor¹[Even if there was not enough flavor in the knife to permeate the whole radish, since we don't know how the flavor distributed, when dealing with individual pieces we must account for the possibility that the distribution of flavor disproportionately affected the individual pieces we're dealing with.] and the dairy therefore needs to be 60 times larger than the piece of radish.
- If the knife contained flavor of $\int \hat{U}^{\wedge} \tilde{O}^{\wedge}, \hat{A} \text{F} \dagger V \hat{a} \nu \text{R} \text{æVVB} \text{c} \text{F} - \ddot{O} W_2 \text{F} \dagger \text{R} \nu \dagger \ddot{o} \text{ÆR} \& \text{F} -6, \hat{A} \text{P}$ ven if the knife was smaller than the radish. This is because we have to assume that the $\int \hat{U}^{\wedge} \tilde{O}^{\wedge}, \text{F} -7 \text{G} \& - \text{uted}$ just enough flavor to each piece of the radish to render that piece prohibited (meaning each piece would absorb more than 1/60 of its volume of $\int \acute{a} \int U \hat{e}$ flavor), and then $\int u \hat{a}''^{\wedge}$ could say that we need to treat each piece as fully prohibited.

1. p. ?

If the Status of the Knife is Uncertain:

1. see $\wedge \forall \hat{\alpha} \dots \tilde{O}] \tilde{O} \wedge \hat{C} \hat{A} \hat{\alpha} \forall \hat{Y}] \mu \tilde{U}] \bullet \hat{Y}] \tilde{U} \wedge \hat{Y}] \hat{\alpha}] \tilde{U}] \mathbf{U} \mathbf{B}] \hat{\alpha} \hat{\alpha} \hat{\delta}$
2. p. ?

Similarly, one may buy lemon juice or salted fish from a non-jew that the non-jew "brought in barrels" (i.e. made in bulk) ($\wedge \bullet \tilde{O}''^{\wedge} \text{ é]}\tilde{O} \acute{a}^r \acute{O}$). This because even if the non-jew used a knife of] $\hat{U}^{\wedge} \tilde{O}^{\wedge}, \hat{A} F$ become] $\emptyset\hat{A} -\hat{a} F\ddagger R \text{Æ}$ ge volume of lemons/fish^{[only if the lemons were halved (sliced once)}. If they were quartered (sliced twice, with the second slice bisecting the first) the] $\hat{U}^{\wedge} \tilde{O}^{\wedge}, v-\text{Æ}\hat{A} \text{æPver}$ become] $\emptyset\hat{A}\hat{A} \&V6 W6R F\ddagger R \P\text{æ}-fR v-\text{Æ}\hat{A} V\tilde{O}-B \text{Đ}] \bullet \acute{a}] Uè$ into the lemon with the first slice and that section of the lemon will become] $u\grave{a}''^{\wedge} \hat{a}$ When the second slice passes through that area, the new] $u\grave{a}''^{\wedge} \text{Đ}] \bullet \acute{a}] Uè$ will be absorbed by the knife and thereby imparted to the next lemon, where the cycle will repeat itself.]. Therefore, we may buy chopped (fermented^{[], %Ö ^•Ý ^ %ç] •Ñ]) cabbage (presumably sauerkraut) from non-jews, although there are places where the custom is not to buy this cabbage from a non-jew and one should not vary from the custom of his area. Any foods that are not (so^{[[], %Ö ^•Ý ^ %ç] •Ò)) acidic, like apples may be bought when produced in bulk ($\wedge \dots P''] \text{ é]}\tilde{O}'\grave{a}$}}

Slicing Non-]uè]•ã Foods:

If one slices a non-*yay* food, like a cucumber, with a meat knife, there are no *yay* transferred, and so the cucumber may be eaten with dairy. If the knife was dirty, the food needs to be cleaned of residue before it can be eaten with dairy, so something moist and soft like a cucumber needs to have the area of the slice scraped away.^{[Fish that is recognizably kosher (such as salmon) but was sliced with a knife that was used for non-kosher fish may be scrubbed at the point of contact with the knife and it is permitted (^{B^r}).], while something hard like a turnip^{[^{Aä} – F†R é]R%â}, which translates as ...^Ü ^{Ü"}joÄ ÷" /ÆV&Vâ – â vW&Ö âÄ vt–6, G& ç6Æ FW2IF6GÖÇe#A" –òSöôC' æVVG2}

Turnip:

Turnip has a special property, namely that if one slices a turnip with a meat knife and then slices a $\text{J5}\tilde{\text{N}}^{\wedge}, \times^{\wedge} \dots \dot{\text{U}}^{\wedge} \text{Æ} - ^{\circ} \text{e}$ a radish, the radish will not absorb meat flavor because the turnip residue on the knife neutralizes the $\text{Juè}] \cdot \tilde{\text{a}}] \text{Uê}$ of the radish $(^{\wedge} \cdot \tilde{\text{O}}^{\wedge} \text{' } ^{\wedge} \text{é}] \text{Ò' } \hat{\text{A}}$ but only on the first slice immediately following the slicing the turnip $(^{\wedge} \dots \text{P}^{\wedge}] \text{é}] \text{Ò' } \hat{\text{a}}$ That said, one cannot rely on this $\text{J}\hat{\text{A}} \hat{\text{U}}^{\wedge} \text{¥} \times] \cdot \ddot{\text{U}}] \text{B}\hat{\text{A}} \ddot{\text{O}} \text{V æ} - \text{ær} - \text{b öæR} \dagger 2 \ddot{\text{O}} \text{V B } \P \text{æ} - \text{f}$ cut $\text{Juè}] \cdot \tilde{\text{a}}$ dairy, he may not slice a turnip and then slice the dairy, but if he does, the dairy will be permitted $(^{\wedge} \% \dot{\text{U}}^{\wedge} \text{ } ^{\wedge} \cdot \dot{\text{Y}}^{\wedge} \% \zeta \text{ }] \mu \tilde{\text{N}})$.

1. see Measurements, Surface Level, p. ?

To Which Prohibitions Does $\text{Juâ}^{\wedge} \%à$ Apply:

According to basic Torah law, when $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, —2 6öÖ&—æVB v—F, $\hat{\text{O}}\text{J}^{\bullet}\hat{\text{e}}^{\wedge}$, ‡7V6, 2 à] $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ falling into cholent, the resulting mixture is prohibited, so long as the $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ is important to note that the $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ itself does not become $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, it just becomes inextricably linked with the $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, †fÆ vor of the $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$ throughout the cholent) so that it practically cannot be consumed without also consuming the $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, à

However, when meat and milk are cooked together, they each become prohibited intrinsically, not just due to the meat/milk present in the milk/meat. This is because both the meat and the milk are permitted substances, so if the mixture is declared prohibited, the components must necessarily become prohibited themselves. This concept is known as $\text{Juê}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \dots \times^{\wedge} \%à$ becomes $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \text{'æRâ} -\zeta\text{G\&}-\zeta6-6 \text{ÆÇ}' \text{ \&ö†}-\&—FVB}' \dots \hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$.

There is a major dispute amongst the $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$ whether there is a $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ extension of $\text{Juâ}^{\wedge} \%à$ from $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ prohibitions. The $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$ rules that there is no such extension and the $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$ (and therefore work, as it is written from an Ashkenazic perspective) rules that there is.

The Ramifications of $\text{Juâ}^{\wedge} \%à$:

The primary consequence of $\text{Juâ}^{\wedge} \%à$ occurs when the prohibited mixture (a cholent containing $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$) itself is mixed into a larger permitted dish (a chicken soup, for example). Without $\text{Juâ}^{\wedge} \%à$, the larger dish need only contain 60 times the original $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, à æB —â `act the permitted component can be counted towards that 60 (the soup and the cholent together need to be 60 times the $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$). With $\text{Juâ}^{\wedge} \%à$, the permitted component of the original mixture becomes intrinsically prohibited, requiring the second permitted dish to be 60 times the entire first mixture, not just the original $\text{J}^{\wedge} \tilde{\text{U}}^{\wedge} \tilde{\text{O}}^{\wedge}$, ‡F†R 6÷W ×W7B be 60 times large than the entire cholent, not just the $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \dots \hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$.

$\text{Juâ}^{\wedge} \%à$ and $\text{Jâ}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$:

1. see $\hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge} \hat{\text{e}}^{\wedge} \tilde{\text{N}}\text{J}^{\bullet}\tilde{\text{U}}\text{J}^{\wedge} \tilde{\text{O}}^{\wedge}$

According to the ¹⁰ If meat fell into boiling milk, it can be given to a non-jew to taste. This is only if the meat was taken out before it had a chance to expel the milk it absorbed, which is when the milk stops boiling. If it was not removed before then, then ¹¹ tells us that the milk that was expelled by the meat is prohibited, but it is ¹² in the rest of the milk, so it cannot be tasted and the pot therefore needs ¹³ against the milk (which we assume has the same volume as the meat). The ¹⁴ ¹⁵ ¹⁶ ¹⁷ ¹⁸ ¹⁹ ²⁰ ²¹ ²² ²³ ²⁴ ²⁵ ²⁶ ²⁷ ²⁸ ²⁹ ³⁰ ³¹ ³² ³³ ³⁴ ³⁵ ³⁶ ³⁷ ³⁸ ³⁹ ⁴⁰ ⁴¹ ⁴² ⁴³ ⁴⁴ ⁴⁵ ⁴⁶ ⁴⁷ ⁴⁸ ⁴⁹ ⁵⁰ ⁵¹ ⁵² ⁵³ ⁵⁴ ⁵⁵ ⁵⁶ ⁵⁷ ⁵⁸ ⁵⁹ ⁶⁰ ⁶¹ ⁶² ⁶³ ⁶⁴ ⁶⁵ ⁶⁶ ⁶⁷ ⁶⁸ ⁶⁹ ⁷⁰ ⁷¹ ⁷² ⁷³ ⁷⁴ ⁷⁵ ⁷⁶ ⁷⁷ ⁷⁸ ⁷⁹ ⁸⁰ ⁸¹ ⁸² ⁸³ ⁸⁴ ⁸⁵ ⁸⁶ ⁸⁷ ⁸⁸ ⁸⁹ ⁹⁰ ⁹¹ ⁹² ⁹³ ⁹⁴ ⁹⁵ ⁹⁶ ⁹⁷ ⁹⁸ ⁹⁹ ¹⁰⁰ ¹⁰¹ ¹⁰² ¹⁰³ ¹⁰⁴ ¹⁰⁵ ¹⁰⁶ ¹⁰⁷ ¹⁰⁸ ¹⁰⁹ ¹¹⁰ ¹¹¹ ¹¹² ¹¹³ ¹¹⁴ ¹¹⁵ ¹¹⁶ ¹¹⁷ ¹¹⁸ ¹¹⁹ ¹²⁰ ¹²¹ ¹²² ¹²³ ¹²⁴ ¹²⁵ ¹²⁶ ¹²⁷ ¹²⁸ ¹²⁹ ¹³⁰ ¹³¹ ¹³² ¹³³ ¹³⁴ ¹³⁵ ¹³⁶ ¹³⁷ ¹³⁸ ¹³⁹ ¹⁴⁰ ¹⁴¹ ¹⁴² ¹⁴³ ¹⁴⁴ ¹⁴⁵ ¹⁴⁶ ¹⁴⁷ ¹⁴⁸ ¹⁴⁹ ¹⁵⁰ ¹⁵¹ ¹⁵² ¹⁵³ ¹⁵⁴ ¹⁵⁵ ¹⁵⁶ ¹⁵⁷ ¹⁵⁸ ¹⁵⁹ ¹⁶⁰ ¹⁶¹ ¹⁶² ¹⁶³ ¹⁶⁴ ¹⁶⁵ ¹⁶⁶ ¹⁶⁷ ¹⁶⁸ ¹⁶⁹ ¹⁷⁰ ¹⁷¹ ¹⁷² ¹⁷³ ¹⁷⁴ ¹⁷⁵ ¹⁷⁶ ¹⁷⁷ ¹⁷⁸ ¹⁷⁹ ¹⁸⁰ ¹⁸¹ ¹⁸² ¹⁸³ ¹⁸⁴ ¹⁸⁵ ¹⁸⁶ ¹⁸⁷ ¹⁸⁸ ¹⁸⁹ ¹⁹⁰ ¹⁹¹ ¹⁹² ¹⁹³ ¹⁹⁴ ¹⁹⁵ ¹⁹⁶ ¹⁹⁷ ¹⁹⁸ ¹⁹⁹ ²⁰⁰ ²⁰¹ ²⁰² ²⁰³ ²⁰⁴ ²⁰⁵ ²⁰⁶ ²⁰⁷ ²⁰⁸ ²⁰⁹ ²¹⁰ ²¹¹ ²¹² ²¹³ ²¹⁴ ²¹⁵ ²¹⁶ ²¹⁷ ²¹⁸ ²¹⁹ ²²⁰ ²²¹ ²²² ²²³ ²²⁴ ²²⁵ ²²⁶ ²²⁷ ²²⁸ ²²⁹ ²³⁰ ²³¹ ²³² ²³³ ²³⁴ ²³⁵ ²³⁶ ²³⁷ ²³⁸ ²³⁹ ²⁴⁰ ²⁴¹ ²⁴² ²⁴³ ²⁴⁴ ²⁴⁵ ²⁴⁶ ²⁴⁷ ²⁴⁸ ²⁴⁹ ²⁵⁰ ²⁵¹ ²⁵² ²⁵³ ²⁵⁴ ²⁵⁵ ²⁵⁶ ²⁵⁷ ²⁵⁸ ²⁵⁹ ²⁶⁰ ²⁶¹ ²⁶² ²⁶³ ²⁶⁴ ²⁶⁵ ²⁶⁶ ²⁶⁷ ²⁶⁸ ²⁶⁹ ²⁷⁰ ²⁷¹ ²⁷² ²⁷³ ²⁷⁴ ²⁷⁵ ²⁷⁶ ²⁷⁷ ²⁷⁸ ²⁷⁹ ²⁸⁰ ²⁸¹ ²⁸² ²⁸³ ²⁸⁴ ²⁸⁵ ²⁸⁶ ²⁸⁷ ²⁸⁸ ²⁸⁹ ²⁹⁰ ²⁹¹ ²⁹² ²⁹³ ²⁹⁴ ²⁹⁵ ²⁹⁶ ²⁹⁷ ²⁹⁸ ²⁹⁹ ³⁰⁰ ³⁰¹ ³⁰² ³⁰³ ³⁰⁴ ³⁰⁵ ³⁰⁶ ³⁰⁷ ³⁰⁸ ³⁰⁹ ³¹⁰ ³¹¹ ³¹² ³¹³ ³¹⁴ ³¹⁵ ³¹⁶ ³¹⁷ ³¹⁸ ³¹⁹ ³²⁰ ³²¹ ³²² ³²³ ³²⁴ ³²⁵ ³²⁶ ³²⁷ ³²⁸ ³²⁹ ³³⁰ ³³¹ ³³² ³³³ ³³⁴ ³³⁵ ³³⁶ ³³⁷ ³³⁸ ³³⁹ ³⁴⁰ ³⁴¹ ³⁴² ³⁴³ ³⁴⁴ ³⁴⁵ ³⁴⁶ ³⁴⁷ ³⁴⁸ ³⁴⁹ ³⁵⁰ ³⁵¹ ³⁵² ³⁵³ ³⁵⁴ ³⁵⁵ ³⁵⁶ ³⁵⁷ ³⁵⁸ ³⁵⁹ ³⁶⁰ ³⁶¹ ³⁶² ³⁶³ ³⁶⁴ ³⁶⁵ ³⁶⁶ ³⁶⁷ ³⁶⁸ ³⁶⁹ ³⁷⁰ ³⁷¹ ³⁷² ³⁷³ ³⁷⁴ ³⁷⁵ ³⁷⁶ ³⁷⁷ ³⁷⁸ ³⁷⁹ ³⁸⁰ ³⁸¹ ³⁸² ³⁸³ ³⁸⁴ ³⁸⁵ ³⁸⁶ ³⁸⁷ ³⁸⁸ ³⁸⁹ ³⁹⁰ ³⁹¹ ³⁹² ³⁹³ ³⁹⁴ ³⁹⁵ ³⁹⁶ ³⁹⁷ ³⁹⁸ ³⁹⁹ ⁴⁰⁰ ⁴⁰¹ ⁴⁰² ⁴⁰³ ⁴⁰⁴ ⁴⁰⁵ ⁴⁰⁶ ⁴⁰⁷ ⁴⁰⁸ ⁴⁰⁹ ⁴¹⁰ ⁴¹¹ ⁴¹² ⁴¹³ ⁴¹⁴ ⁴¹⁵ ⁴¹⁶ ⁴¹⁷ ⁴¹⁸ ⁴¹⁹ ⁴²⁰ ⁴²¹ ⁴²² ⁴²³ ⁴²⁴ ⁴²⁵ ⁴²⁶ ⁴²⁷ ⁴²⁸ ⁴²⁹ ⁴³⁰ ⁴³¹ ⁴³² ⁴³³ ⁴³⁴ ⁴³⁵ ⁴³⁶ ⁴³⁷ ⁴³⁸ ⁴³⁹ ⁴⁴⁰ ⁴⁴¹ ⁴⁴² ⁴⁴³ ⁴⁴⁴ ⁴⁴⁵ ⁴⁴⁶ ⁴⁴⁷ ⁴⁴⁸ ⁴⁴⁹ ⁴⁵⁰ ⁴⁵¹ ⁴⁵² ⁴⁵³ ⁴⁵⁴ ⁴⁵⁵ ⁴⁵⁶ ⁴⁵⁷ ⁴⁵⁸ ⁴⁵⁹ ⁴⁶⁰ ⁴⁶¹ ⁴⁶

Localized Juâ^ %â:

If a drop of milk falls into a pot of meat and we know which piece of meat it fell on — if the piece of meat is not large enough to nullify^[2] the milk without the assistance of the rest of the food in the pot, the piece will become $\frac{1}{2}$ kosher. This is only true if the contents of the pot were not stirred¹ [because the stirring distributes the milk throughout the pot before it has a chance to be absorbed into the meat it landed on] or covered² [because when a boiling pot is covered, the intense steam makes even what's above the surface of the liquid as if it's submerged] "from beginning to end, rather they were only stirred/covered at the end," but if they were stirred/covered from beginning to end, the whole pot would combine to nullify the drop of milk ($\frac{1}{2}$ kosher).

The $\frac{1}{2}$ and $\frac{1}{2}$ have many disagreements about the above paragraph, most of which stem from the following disagreement between $\frac{1}{2}$ and $\frac{1}{2}$ "if

1. see ^¥â^...Õ] Õ^¢Â F3""cBÂ â ð

2. see $\wedge \hat{y} \hat{a} \wedge \dots \tilde{O} \tilde{O} \wedge c \hat{A} \tilde{N} \tilde{I} \hat{A} \tilde{U} \wedge \% \tilde{O} \wedge c \text{ b } \emptyset \wedge \% \acute{Y} \text{]} \mu \hat{a} \text{]} \cdot c \wedge, \hat{A} \hat{a} \delta$

- According to $\hat{\cdot}\%Û$, the above is referring to where the piece of meat upon which the milk landed was not at all submerged in the liquid in the pot, rather it was resting atop another piece of meat. If it had been even partially submerged, the milk would have passed through the meat into the pot and distributed throughout.
- According to $\hat{\cdot}\dots\acute{e}]'\hat{\cdot}\hat{\cdot}F\ddagger R$ &ðve can even be when the meat was partially submerged; since the upper portion of the meat is unsubmerged, the milk doesn't flow[^][shloop] through the meat into the rest of the pot, rather it prohibits the meat upon which it landed, which then exudes its now $] \acute{a}]U\grave{e}$ flavor into the rest of the pot.

The $] ,\%Ö (\hat{\cdot}\hat{\cdot}\acute{Y} \hat{\cdot}\%ç] ' 6 —2 F\ddagger B F\ddagger R \acute{e}]R\%â$ is written according to $\hat{\cdot}\dots\acute{e}]'\hat{\cdot}\hat{\cdot}\&V6 W6R vR \times W7B \&R F—$ the meat was partially submerged. Otherwise, we wouldn't need to have enough in the pot to nullify the meat, we'd just take it out.

The $\hat{\cdot}\%Ú (\hat{\cdot}\%ç]UÓ]U\grave{e}]E\hat{U}^{\hat{\cdot}} \tilde{a} \hat{\cdot}\hat{\cdot}\acute{Y})$ argues with the $] ,\%Ö$ and says that the $\hat{\cdot}\hat{\cdot}\tilde{O}''^{\hat{\cdot}} 6 —2 v\ddot{o}—æR \mathbb{A}—^{\circ}e$ the $\hat{\cdot}\%Û$. *A* the meat, we're simply discussing a case where the pot was mixed after the milk fell on the meat.

As far as stirring/covering, both the $] ,\%Ö$ and $\hat{\cdot}\%Ú$ agree that when the $\hat{\cdot}\hat{\cdot}\tilde{O}''^{\hat{\cdot}} 6 —2 \&g\&\ddot{o}\ddot{O} \&P$ ginning to end he means that it was stirred at "the beginning" — when the milk first fell in — but not necessarily that he must continuously mix it until "the end" — when the pot cools off and flavor stops transferring. The $\hat{\cdot}\hat{\cdot}\tilde{O}''^{\hat{\cdot}} \&VfW'2 F\grave{o} —B 2 \&\&P$ ginning to end" only to contrast with when the pot is stirred at the end only, which is not enough to avoid $]u\hat{a}^{\hat{\cdot}} \%à$. This is also the opinion of the $\hat{\cdot}\dots\grave{b}"] F\ddagger W\&R\hat{a}$. The $\hat{\cdot}\dots\grave{b}"] \dots\acute{e}]Ö' 6 —2 F\ddagger B —b \ddagger R F—F\hat{a}wB 7F—" F\ddagger R \ddagger B B \mathbb{A}\hat{\cdot} VçF—\hat{\cdot} —B 6\ddot{o}\ddot{O}\mathbb{A}VB \ddot{o}^f$, if the pot has then only the piece upon which the milk landed is prohibited.

Both the $] ,\%Ö$ and $\hat{\cdot}\%Ú$ ask that if the flavor isn't leaving the piece — as evidenced by the fact that the pot need only have 60 times the *milk* — why do we need to nullify the milk at all? It remains within the piece it landed on!

The $\hat{\cdot}\% \hat{\cdot}\hat{\cdot}$ answers that if the piece was fully unsubmerged, the pot would not need 60 times the milk. The $\hat{\cdot}\dots\hat{\cdot}$ —2 —ç7FV B &VfW'&—æR Fò 6 6R v†W&R F†R ÖV B pas partially submerged, and he is unsure whether we rule like the $\hat{\cdot},\% \hat{\cdot}$ or $\hat{\cdot}\dots\hat{\cdot}$ ']' Â 'æRâ v†WF†W" F†R Ö—Æ² 7F —2 v—F†—â F†R —V6R ÷" . through into the pot, so as long as there's 60 times the milk in the pot, the pot is permitted either way. $\hat{\cdot}\dots\hat{\cdot}\hat{\cdot}\% \hat{\cdot}$ answers that the $\hat{\cdot}\dots\hat{\cdot}$ '] †öÆG2 —â vVæW& Â F† B vR Àways need to suspect that the meat v and so in this case it could be the meat was fatty and the milk was transported through the meat and into the pot, so therefore the pot needs $\hat{\cdot}\hat{\cdot}\hat{\cdot}\% \hat{\cdot}$ against the milk.

If, however, it was *not* known which piece of meat the milk fell on, the $\hat{\cdot}\hat{\cdot}\hat{\cdot}\hat{\cdot}\hat{\cdot}$ 'VÆW2 F† B öæR 6 â 7F—" the pot and then the milk is nullified so long as the mixture contains 60 times the milk. The $\hat{\cdot}\dots\hat{\cdot}$ '] argues that mixing it after it fell in doesn't help, it needs to be immediate (and so this presumably would be subject to the laws of being]âÑ[...Ü]•Ñ^' Ñ]•Ñ^' Â ÇF†÷Vv, F†R Ø"]b '&—æw2 â ÷ —a don't say]uâ^ %â when we don't know which piece it landed on).

Secondary Flavor Transfer ($\hat{\cdot}\hat{\cdot}\hat{\cdot}\hat{\cdot}\hat{\cdot}$]...â]Ò Ñ^, à]Uê]ò Ø^%Ý):

1. see $\wedge \forall \hat{a} \wedge \dots \bar{O} \bar{J} \bar{O} \wedge \hat{A} \wedge C$ “ $\vdash \hat{A} \hat{a} \bar{d}$ ”
2. see $\wedge \forall \hat{a} \wedge \dots \bar{O} \bar{J} \bar{O} \wedge \hat{A} F3F s$ “ $\hat{A} \hat{a} \bar{d}$ ”
3. see $\wedge \forall \hat{a} \wedge \dots \bar{O} \bar{J} \bar{O} \wedge \hat{A} \quad 3 \# VB \hat{A} \hat{a} \bar{d}$
4. see $\wedge \forall \hat{a} \wedge \dots \bar{O} \bar{J} \bar{O} \wedge \hat{A} \bar{N} \bar{J} \bar{o} \bar{U} \bar{J} \bar{U} \bar{J} \bar{R} \hat{A}$ $\hat{a} \bar{d}$
5. see $\wedge \forall \hat{a} \wedge \dots \bar{O} \bar{J} \bar{O} \wedge \hat{A}$ “ $S3-B \hat{A} \hat{a} \bar{d}$ ”

Such a scenario would be called a prohibited secondary flavor transfer (אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃). transfer from the meat to the pot and a secondary transfer of that same flavor from the pot to the dairy, which results in a prohibition, i.e. שֶׁנֶּחֱדָשׁ׃ There is a special law that in the event *permitted* secondary flavor transfer (אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃), like the above case but with fish instead (Meat>Pot>Fish), the meat flavor is considered to have been weakened to the point of exclusion from [1]. (אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃), see below^[3]) and the fish can therefore be eaten with dairy^[4]. (And the fish itself can be eaten, according to the [4]. Even though it would be prohibited due to אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃ had it absorbed the flavor directly from the meat at least as far as the laws of שֶׁנֶּחֱדָשׁ׃) According to the [א] himself, any combination of fish and dairy is practically prohibited due to אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃ even though the fish would not be permitted to eat with dairy had it absorbed the same quantity of flavor directly from the meat, such as if the pot wasn't cleaned well^[5]. (Meaning if one *knows* that the pot wasn't cleaned well. If he doesn't know either way, he can assume that it was clean (אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃) and there was meat residue in the pot amounting to more than 1/60 of the fish (אִם הָיָה בָּהֶן טֶמְעָה מִבָּשָׂר וְהָיָה בָּהֶן טֶמְעָה מִחֵלֶבֶת וְהָיָה בָּהֶן טֶמְעָה מִדָּבָר אֲחֵר׃).

This stringency would only apply to eating the fish with dairy, but even the stringent opinion would agree that to place $\hat{\Lambda} \hat{N}'' \hat{\Lambda}$ `ish (Meat>Pot>Fish) on a dairy plate would be permitted.

Sharp Foods ($] 5 \hat{N} \hat{\Lambda}, \times \hat{\Lambda} \dots \hat{U} \hat{\Lambda} 2$ “

Sharp foods are an exception to $\hat{\Lambda} \hat{N}'' \hat{\Lambda} \hat{A} 2 F \dagger V$ —" 6† ' æW72 ÆÆðws them to more powerfully draw the $] \hat{U}$] from their source (the pot, or the grinder, in a case of spices that were ground with a grinder that contains meat $] \hat{U}$]·â]Uê), effecting the transfer without weakening the pot or grinder if not $] \hat{a}]' \hat{U}] U \hat{D}] \delta$ [1]. Therefore, if the sharp food or spices fall into dairy, the mixture must contain 60 times the sharp food or spices^[We only need 60 times the spices, because although spices are not normally $] \emptyset] \hat{A} - \hat{a} c \& V6 W6R F \dagger V$ —" fÆ vor is still detectable at far greater ratios, these spices are not intrinsically prohibited when combined with dairy, only the meat flavor they contain, which is $] \emptyset] \hat{A}$ in 60 ($\hat{\Lambda}' \% \hat{U} \hat{\Lambda} \hat{r} \hat{æ}] B \hat{a}'' \hat{r} \times$)] in order to be permitted ($\hat{\Lambda} \dots \hat{P}''$] æ]C¥Ñ).

Washing Dishes:

1. see $\hat{\Lambda} \hat{\Psi} \hat{\Lambda} \dots \hat{O}] \hat{O} \hat{\Lambda} \hat{C} \hat{A} \& V - \text{avigorating the }] \hat{U} \hat{\Lambda} \hat{O} \hat{\Lambda}, \dots \hat{P}] \mu \hat{U}] \cdot \hat{D}] \hat{\Lambda} \hat{e}] \times$), p. ?

The $\hat{\Lambda} \dots \hat{P}''] \dots \acute{e}] \hat{O}'$ gues, and rules that both utensils are prohibited, even in a case where both of them are clean (assuming they are both $] \acute{a}]' \hat{U}] U] \hat{O} \hat{a}$ The reason is either that we are worried that the utensils will make direct contact and flavor will transfer from one to the other and be $\hat{\Lambda} \hat{N}'' (M \acute{o} \acute{e}] \hat{U} \hat{O} \hat{\Lambda} \dots \hat{D}$ Dairy>Utensil>Utensil(containing Dairy/Meat)), or that we are worried that the meat and dairy $] \hat{U}] \cdot \hat{a}] U \hat{e}$ will combine immediately in the water, rendering the water $] \acute{a}] U \hat{e}$, which in turn makes the utensils $] \acute{a}] U \hat{e}$ ($\hat{\Lambda} \cdot \acute{Y} \hat{\Lambda} \% \zeta] r' \hat{a}$ The $\hat{\Lambda} \dots \hat{P}''] \quad F G 2 F \dagger B \vee R \acute{o} \acute{a} \zeta' \quad \& \acute{o} \dagger - \& - B F \dagger R W F V \zeta 6 - \zeta 2 - b F \dagger P y$ were washed sequentially in the basin, but if they were washed sequentially (meaning they were never in the water at the same time), or the hot water in the basin was a $] \hat{U}] U \hat{e}$ they would be permitted, because:

1. see $\Lambda^{\mathbb{A}} \hat{\Lambda} \dots \tilde{O}] \tilde{O} \wedge \hat{A} \tilde{N}] \partial \cup] U \cup] R \hat{A} \hat{a} \tilde{\partial}$
2. p. ?
3. see $\Lambda^{\mathbb{A}} \hat{\Lambda} \dots \tilde{O}] \tilde{O} \wedge \hat{A} \hat{U}] 2 \acute{a}] U \tilde{U}] 5 \hat{e}, p. ?$
4. p. ?
5. p. ?
6. see $] \hat{U} \wedge \tilde{O}] \hat{A} \hat{O} \tilde{6} \tilde{\partial} \P - \text{ær} \hat{A} \hat{U}] \hat{A} \hat{U} \wedge \dots \tilde{\partial} \wedge \tilde{O}] \partial \hat{A} \hat{a} \tilde{\partial}$
7. see $] \hat{U} \wedge \tilde{O}] \hat{A} \hat{O} \tilde{6} \tilde{\partial} \P - \text{ær} \hat{A} \hat{U}] \hat{A} \hat{U} \wedge \hat{a}] \hat{A} \hat{a} \tilde{\partial}$

- If they weren't in the water at the same time, the two utensils can never make direct contact, and the meat/milk flavor emitted from the first utensil will have come to rest in the water as $\hat{\text{N}}''^{\wedge}$ by the time the second utensil is placed in the water, therefore even if the meat/milk flavor then mingles with the milk/meat flavor emitted by the second utensil, the flavors won't combine to create a prohibition.
- If the water was a $\text{J}\mu\ddot{\text{U}}\text{J}' \acute{\text{e}}^{\wedge} \ddot{\text{U}}$, then, being that we rule like the opinion that a $\text{J}\mu\ddot{\text{U}}\text{J}' \acute{\text{e}}^{\wedge} \ddot{\text{U}}$ does not have the ability to transfer $\text{J} \ddot{\text{U}}\text{J} \cdot \hat{\text{a}}\text{J}\ddot{\text{U}}$, the water can't draw the meat and milk flavor out of, or impart flavor into, the utensils in order to create $\text{J} \ddot{\text{U}}^{\wedge} \ddot{\text{O}}^{\wedge}, \hat{\text{a}}$. This would even be true if the utensils were dirty, the $\text{J}\mu\ddot{\text{U}}\text{J}' \acute{\text{e}}^{\wedge} \ddot{\text{U}}$ has no ability to cause the $\text{J} \ddot{\text{U}}\text{J} \cdot \hat{\text{a}}\text{J}\ddot{\text{U}}$ to move, and so this is no worse than combining cold meat and milk together ($\text{J}, \% \ddot{\text{O}}^{\wedge} \cdot \acute{\text{Y}}^{\wedge} \% \zeta \text{J} \cdot \ddot{\text{N}}^{\wedge}$).

Even according to the $\hat{\text{A}} \ddot{\text{O}}''^{\wedge} \hat{\text{A}} \ddot{\text{O}} \ddot{\text{A}} \text{R} 6 \ddot{\text{t}} \div \text{V} \ddot{\text{A}} \text{B} \ddot{\text{a}} \div \text{B}$ pash meat and milk dishes together $\text{J} \hat{\text{A}} \ddot{\text{U}}^{\wedge} \times \text{J} \cdot \ddot{\text{U}}\text{J} \hat{\text{B}} \hat{\text{A}}$ Pven if $\text{J} \hat{\text{a}}\text{J}' \ddot{\text{U}}\text{J} \ddot{\text{U}} \text{J} \ddot{\text{O}} \hat{\text{A}} \& \ddot{\text{N}}^{\wedge} \text{C} \text{S} \text{V} \text{C} \text{B} \text{O} \text{R} \text{O} \text{F}$ and $\hat{\text{A}} \ddot{\text{O}} \hat{\text{A}} \hat{\text{A}}$ only permitted $\text{J} \acute{\text{O}}\text{J} \cdot \hat{\text{a}}\text{J} \acute{\text{O}}$.

If a dairy utensil was found amongst meat utensils (or vice versa), we are not concerned that they may have been washed together in a way that would prohibit the dairy utensil, and it is therefore permitted ($\hat{\text{A}} \dots \text{P}''\text{J} \acute{\text{e}}\text{J} \ddot{\text{O}}' \hat{\text{a}}$).

Ashes (Dish Soap):

In a case of washing a meat utensil and dairy utensil together, if one added ashes to the water before adding the utensils, the utensils do not become prohibited, because the ashes render the water, and any $\text{J} \ddot{\text{U}}\text{J} \cdot \hat{\text{a}}\text{J}\ddot{\text{U}}$ they subsequently absorb from the $\text{J} \ddot{\text{U}}\text{J} \cdot \hat{\text{a}}\text{J}\ddot{\text{U}}$ the same would apply nowadays to dish soap, R' Lefkowitz) ($\hat{\text{A}} \cdot \ddot{\text{O}}''^{\wedge} \acute{\text{e}}\text{J} \ddot{\text{O}} \acute{\text{a}}''^{\wedge} \text{r} \acute{\text{O}}$).

The $\text{J}, \% \ddot{\text{O}}^{\wedge} (\hat{\text{A}} \cdot \acute{\text{Y}}^{\wedge} \% \zeta \text{J} \dots \ddot{\text{O}})$ and $\hat{\text{A}}' \% \acute{\text{U}} (\hat{\text{A}} \cdot \acute{\text{Y}}^{\wedge} \% \zeta \text{J} \mu \ddot{\text{D}})$ both argue on this ruling:

1. p. ?

2. see $\hat{\text{A}} \ddot{\text{A}}^{\wedge} \dots \ddot{\text{O}}\text{J} \ddot{\text{O}}^{\wedge} \hat{\text{A}} \hat{\text{a}}\text{J}\ddot{\text{U}} \text{J} \ddot{\text{O}} \hat{\text{A}} \% \acute{\text{Y}} \text{J} \hat{\text{A}} \hat{\text{a}}\text{J} \% \acute{\text{Y}}$, p. ?

3. see $\hat{\text{A}} \ddot{\text{A}}^{\wedge} \dots \ddot{\text{O}}\text{J} \ddot{\text{O}}^{\wedge} \hat{\text{A}} \hat{\text{a}}\text{J}\ddot{\text{U}} \text{J} \ddot{\text{O}} \hat{\text{A}} \% \acute{\text{Y}} \text{J} \hat{\text{A}} \hat{\text{a}}\text{J} \% \acute{\text{Y}}$, p. ?

- [illegible]

The ^B%ê (^\acute{Y} ^ %ç]R' ç7vW'2 f÷" F†R é]R%â that ash does not have the ability to render prohibited flavor ^ therefore inert. The $\hat{\Lambda} \dots \hat{D}'']$ $\hat{6} \hat{o} \hat{\zeta} \hat{F} - \hat{\zeta} \hat{V} \hat{W} \hat{2} \hat{F} \hat{\dagger} \hat{B} - \hat{b} \hat{o} \hat{a} \hat{R} \hat{\div} \hat{W} \hat{\&} \hat{V} \hat{B} \hat{g} \hat{\&} \hat{o} \hat{O} \hat{\text{æ}} \hat{W} \hat{W} \hat{G} \hat{\&} \hat{A} \hat{\ddagger} \hat{\text{'}} \hat{e}) \hat{]}\hat{\mu} \hat{Ü} \hat{]}' \hat{è} \hat{]}\hat{é} \hat{U} \hat{\beta}$ onto a meat utensil simultaneously, even if they both still have residue of meat/dairy on them, they would not be prohibited, because $\hat{\Lambda} \% \hat{Ü} \hat{\Lambda} \dots \hat{Ö} \hat{]}' - \hat{2} \hat{\text{æ}} \hat{\div} \hat{B} \hat{\text{7}} \hat{G} \hat{V} \hat{\text{Æ}} \hat{\zeta}' \hat{\text{Ü}} \hat{]}\hat{A} \hat{Ü} \hat{\Lambda} \dots \hat{D} \hat{\Lambda} \hat{\bullet} \hat{Ö} \hat{]}\hat{o} \hat{A} \hat{\vee} \hat{R} \hat{\S} \hat{W} \hat{7} \hat{B} \hat{G} \hat{\&} \hat{V} \hat{B} - \hat{B} \hat{F} \hat{\dagger} \hat{R} \hat{6} \hat{Ö} \hat{R} - \hat{2}$ finds the above opinion of the $\hat{\Lambda} \dots \hat{D}'']$ $\hat{F} - \hat{\text{'}} \hat{f} \hat{i} \hat{c} \hat{u} \hat{l} \hat{t}$, because it is established law that $\hat{]}\hat{\mu} \hat{Ü} \hat{]}' \hat{è} \hat{]}\hat{é} \hat{U} \hat{\beta}$ should mean that the meat/dairy residue should have their flavor transferred into the outer $\hat{\Lambda} \hat{u} \hat{Ü} \hat{]}' \hat{\text{ä}} \hat{]}\hat{B} \hat{o} \hat{b} \hat{F} \hat{\dagger} \hat{R}$ dairy/meat utensils, rendering that layer prohibited. The $\hat{\Lambda} \dots \hat{D}'']$ $\hat{w} \hat{2} \hat{\div} - \hat{\text{æ}} - \hat{o} \hat{a} \hat{\times} \hat{W} \hat{7} \hat{B} \hat{F} \hat{\dagger} \hat{W} \hat{\&} \hat{V} \hat{f} \hat{\div} \hat{\&} \hat{R} \hat{\&} \hat{R} \hat{F} \hat{\dagger} \hat{B}$ although we know that $\hat{\Lambda} \% \hat{Ü} \hat{\Lambda} \dots \hat{Ö} \hat{]}' \hat{6} \hat{o} \hat{o} \hat{\cdot} \hat{2} \hat{\text{Ü}} \hat{]}\hat{5} \hat{Ü} \hat{\Lambda} \hat{u} \hat{Ü} \hat{]}' \hat{\text{ä}} \hat{]}\hat{B} \hat{\text{'}} \hat{6} \hat{\dagger} - \hat{6} \hat{o} \hat{e} \hat{n}$, that's only by chicken (or similar material) soft and therefore transfers easily, but for utensils, which are hard, $\hat{\Lambda} \% \hat{Ü} \hat{\Lambda} \dots \hat{Ö} \hat{]}'$ could only be able to either absorb or impart flavor, not both, which is what is required to create a prohibition here (the water needs to absorb flavor from the meat/dairy residue and then impart that flavor to the utensil).

The $\hat{\Lambda} \% \hat{Ü}$ doesn't agree with this distinction, and therefore rules:

1. see Measurements, $\hat{]}\hat{\mu} \hat{Ó} \hat{]}' \hat{\zeta} \hat{]}\hat{A} \hat{Ü} \hat{\Lambda} \hat{E} \hat{O}$, p. ?

- If both utensils have residue on them, both utensils will be prohibited $\text{]}\mu\acute{\text{O}}\text{]}'\ \varsigma\text{]}\hat{\text{A}}\hat{\text{U}}^{\wedge}\text{E}\hat{\text{O}}.$
- If only one utensil has residue on it, the utensil without residue will be prohibited $\text{]}\mu\acute{\text{O}}\text{]}'\ \varsigma\text{]}\hat{\text{A}}\hat{\text{U}}^{\wedge}\text{E}\hat{\text{O}}$ (the residue of meat will be absorbed into the water and imparted into the dairy pot), and even the pot with the residue will be prohibited except where this will result in a major loss ($\text{]E}\ddot{\text{a}}^{\wedge}\ \acute{\text{O}}\ \text{]}\hat{\text{a}}\hat{\text{e}}\text{]U}\hat{\text{N}}\text{]B}'$ (because we are worried that the water will extract the $\text{]}\ \tilde{\text{N}}''\text{]r f}\hat{\text{A}}\ \text{vor}$ from the now-prohibited dairy utensil and impart it into the meat utensil, although this is not a strong enough possibility to prohibit in a case of major loss).
- If they were both clean, they are permitted because any flavor transfer will be $\wedge\ \tilde{\text{N}}''^{\wedge}$ (Meat>Utensil>Water>Utensil).
- If they were both clean, but one utensil already contained $\text{]}\ \hat{\text{U}}^{\wedge}\ \hat{\text{O}}^{\wedge},\hat{\text{A}}\ \text{F}\hat{\text{T}}\text{R}\ \text{f}\hat{\text{A}}\ \text{vor}$ will be transferred from the $\text{]}\ \acute{\text{a}}\text{]U}\hat{\text{e}}$ utensil and prohibit it, and $\wedge\ \tilde{\text{N}}''^{\wedge}$ won't help because we don't say $\wedge\ \tilde{\text{N}}''^{\wedge}\ \text{'}\ \hat{\text{D}}\text{]}\cdot\acute{\text{a}}\text{]U}\hat{\text{e}}.$ [There is no $\text{]E}\ddot{\text{a}}^{\wedge}\ \acute{\text{O}}\ \text{]}\hat{\text{a}}\hat{\text{e}}\text{]U}\hat{\text{N}}\text{]B}\ \text{†W}\&\text{R}\hat{\text{A}}\ \text{V}\hat{\text{a}}\hat{\text{E}}-\text{°e}$ the dirty utensil when only one has residue, because here the $\wedge\hat{\text{O}}\hat{\text{U}}^{\wedge}$ absorb flavor from one place (the $\text{]}\ \acute{\text{a}}\text{]U}\hat{\text{e}}$ utensil) and impart it somewhere else (the permitted utensil), as opposed to over there where the flavor needs to be absorbed from the meat residue, imparted to the dairy utensil, further absorbed from the now- $\text{]}\ \tilde{\text{N}}''\text{]r W}\text{FV}\varsigma\hat{\text{6}}-\hat{\text{A}}\hat{\text{A}}\ \hat{\text{a}}\text{B}-\times\ \text{'FVB}$ into the meat utensil.]

The Status of the Water:

Even if the utensils are not $\text{]}\ \hat{\text{a}}\text{'}\ \hat{\text{U}}\text{]U}\hat{\text{P}}\text{]}\hat{\text{o}}\hat{\text{A}}\ \text{F}\hat{\text{T}}\text{R}$ pash water will still be prohibited $\text{]}\hat{\text{A}}\hat{\text{U}}^{\wedge}\text{Y}\times\text{]}\cdot\hat{\text{U}}\text{]B}\hat{\text{A}}\ \varsigma\text{F}\hat{\text{T}}\div\text{Vv}, -\text{b}$ combined with food that would be a case of $\text{]}\ \acute{\text{O}}\text{]}\cdot\hat{\text{a}}\text{]}\ \acute{\text{O}}$ and therefore permitted. This is because $\text{]}\hat{\text{A}}\hat{\text{U}}^{\wedge}\text{Y}\times\text{]}\cdot\hat{\text{U}}\text{]B}\hat{\text{A}}\ \varsigma\text{F}\hat{\text{T}}\div\text{Vv}, -\text{b}$ and the only reason to permit the water is the fact that the $\text{]}\ \hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]U}\hat{\text{e}}$ of meat and milk it contains are not $\text{]}\ \hat{\text{a}}\text{'}\ \hat{\text{U}}\text{]U}\hat{\text{P}}\text{]}\hat{\text{o}}\hat{\text{A}}\ \text{F}\hat{\text{T}}\text{R}$ therefore the water is only permitted in a $\text{]}\ \acute{\text{O}}\text{]}\cdot\hat{\text{a}}\text{]}\ \acute{\text{O}}$ scenario [One could ask, isn't every case where the water has absorbed these $\text{]}\ \hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]U}\hat{\text{e}}$ a $\text{]}\ \acute{\text{O}}\text{]}\cdot\hat{\text{a}}\text{]}\ \acute{\text{O}}$ scenario, the water has already absorbed the $\text{]}\ \hat{\text{U}}\text{]}\cdot\hat{\text{a}}\text{]U}\hat{\text{e}}$? The answer is no, water alone is never considered to be a case of $\text{]}\ \acute{\text{O}}\text{]}\cdot\hat{\text{a}}\text{]}\ \acute{\text{O}}$, because it's no real loss to just spill out the water and replace it (obviously in a drought or other scenario where water is scarce/valuable this would not be true), and the permit of $\text{]}\ \acute{\text{O}}\text{]}\cdot\hat{\text{a}}\text{]}\ \acute{\text{O}}$ only exists because "the Torah has mercy on the money of Jews" ($\text{[}\text{,}\%\hat{\text{O}}^{\wedge}\ \text{r}\ \hat{\text{a}}\text{]B}\ \acute{\text{a}}''^{\wedge}\text{r}\ \hat{\text{U}}\text{) }\cdot\text{[}\text{ }\hat{\text{A}}\hat{\text{a}}\text{]}\%\hat{\text{Y}}, \text{p. ?}$).

1. see $\wedge\hat{\text{Y}}\hat{\text{a}}^{\wedge}\dots\hat{\text{O}}\text{]}\ \hat{\text{O}}^{\wedge}\hat{\text{A}}\ \hat{\text{a}}\text{]U}\hat{\text{e}}\text{]}\hat{\text{o}}\ \hat{\text{O}}^{\wedge}\%\hat{\text{Y}}\ \text{]}\hat{\text{A}}\hat{\text{a}}\text{]}\%\hat{\text{Y}}, \text{p. ?}$

Safeguards Against Cooking:

The Stringencies of the חֻמּוֹת

The חֻמּוֹת lists four stringencies that one should keep to avoid the inadvertent transgression of the laws of בשר בחלב , חֻמּוֹת

Safeguards Against Combination:

Joint Placement on a Table:

It is prohibited to place meat, even of birds^[1] or undomesticated animals^[2], on a table upon which someone is eating dairy, due to the concern that the one eating meat may eat some of the other's dairy over the course of the meal or vice versa^[3] (אֶת־בָּשָׂר אֲשֶׁר יִהְיֶה עִמָּךְ בְּעֵת אֲכִילְתְּ דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ עִמָּךְ עַל שֻׁלְחָן דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ. This law was enacted against the possibility of one casually and unthinkingly eating the other's food. With that in mind, there are a few conditions for this law, without which casual and unthinking eating of the other's food would be unlikely:

1. The two people must have a basic level of familiarity with each other.. ^[The accepted opinion (אֶת־בָּשָׂר אֲשֶׁר יִהְיֶה עִמָּךְ בְּעֵת אֲכִילְתְּ דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ עִמָּךְ עַל שֻׁלְחָן דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ. —2 F† B F†—2 Pven holds true if the two people have an anim would cause them not to share, because we don't want to make the law nuanced, which could lead to mistakes.]
2. The table is the one where the *eating* is taking place, this prohibition doesn't apply to a serving table.
3. The two are sitting near enough that one can reach the other's food (אֶת־בָּשָׂר אֲשֶׁר יִהְיֶה עִמָּךְ בְּעֵת אֲכִילְתְּ דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ עִמָּךְ עַל שֻׁלְחָן דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ. —2 F† B F†—2 Pven holds true if the two people have an anim would cause them not to share, because we don't want to make the law nuanced, which could lead to mistakes.]
4. There is nothing placed between the two of them to serve as a reminder not to eat the other's food. ^[A third-party watcher would not fulfill this requirement (אֶת־בָּשָׂר אֲשֶׁר יִהְיֶה עִמָּךְ בְּעֵת אֲכִילְתְּ דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ עִמָּךְ עַל שֻׁלְחָן דָּגִים וְחַיִּים אֲשֶׁר לֹא יִשְׁחָטוּ. —2 F† B F†—2 Pven holds true if the two people have an anim would cause them not to share, because we don't want to make the law nuanced, which could lead to mistakes.)], the reminder must be an object that serves as a constant reminder directly to the eaters.]

What Qualifies as a Reminder:

1. p. ?

2. p. 30

3. p. ?

As the purpose of the item being placed on the table is to be a constant reminder to those eating not to partake of the other's food, the item must be something that will continually be noticed due to the irregularity of its presence. This precludes any item that would have been on the table even had they both been eating meat or milk, such as a candelabra at night.

Separate Tablecloths:

If the two parties are eating on separate tablecloths or on separate placemats (as long as they are not accustomed to using placemats, psak from R' Tzvi Yaakov Stein), that would qualify as a reminder.

Bread:

A loaf of bread placed between the two parties qualifies as a reminder (אֶלֶּם אֵין חֵטִי) but only if the two of them are not eating from that loaf (אֶלֶּם אֵין חֵטִי)

The אֶלֶּם אֵין חֵטִי FG2 F† B ÇF†÷Vv, F†—2 —2 G'VRÂ —â ÷W" 66Væ &—ò öb Gpo people, one eating meat and the other eating dairy, they shouldn't actually eat from the same loaf because of bits of food that can adhere to the loaf.^[This would presumably not hold true if the loaf was sliced, but I don't have any proof of this.]

A Shared Cup:

If a cup that would not normally be on the table even if it was in use, then even if they are both drinking from it it would qualify as a reminder (אֶלֶּם אֵין חֵטִי)

The אֶלֶּם אֵין חֵטִי FG2 F† B ÇF†÷Vv, F†—2 —2 G'VRÂ —â ÷W" 66Væ &—ò öb Gpo people, one eating meat and the other eating dairy, they shouldn't actually drink from the same cup because of bits of food that can adhere to the cup. Similarly, they should each have their own salt dish.^[This probably wouldn't apply if they use a covered saltshaker like is normal nowadays, as opposed to dipping plates where meat or dairy may fall in, but I again have no proof of this.]

Waiting Between Meat and Dairy:

Dairy After Meat:

One may not eat dairy immediately after eating meat, even of birds^[1] or undomesticated animals^[2] (אֶת־הַבְּרִיָּאִים אֵין מְאִכִּין אַחֲרֵי בָשָׂר). This is because we are worried that the dairy will mix with the meat that was previously eaten, either because meat leaves a lingering taste in the throat when swallowed (אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בְּהוֹרֵם הַלֵּךְ) or because bits of meat get stuck in between the eater's teeth (אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים). We rule stringently to both opinions into account, therefore one must wait even if one chewed food without swallowing (even though, according to אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בְּהוֹרֵם הַלֵּךְ, the waiting period is only triggered by swallowing); if one found meat between his teeth after the waiting period he must remove it (Finding such meat does not extend the waiting period, it continues from the time of the original eating (אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים, אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בְּהוֹרֵם הַלֵּךְ), but the finder must cleanse his palate^[4] (אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים אֵין מְאִכִּין אַחֲרֵי בָשָׂר) and rinse his mouth (אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים אֵין מְאִכִּין אַחֲרֵי בָשָׂר). According to אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים, any meat remaining between the teeth after the waiting period is no longer considered meat and need not be removed (This is because אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים holds that the source for the waiting period is the verse וְלֹא יִשְׁאָל אֶת־הַבָּשָׂר אֶת־הַחֵלֶב וְהַחֵלֶב אֶת־הַבָּשָׂר (Leviticus 22:19), referring to particles of meat stuck between the teeth as meat, teaches us that such particles are considered meat, and even so, אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים said that after the waiting period, one can eat dairy, meaning that we no longer consider the particles between the teeth to be meat.); and one must wait after eating fat like after meat (Even though it doesn't stick in the teeth.) (see אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים).

Length of the Waiting Period:

The source for waiting between meat and dairy is אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים. It prohibits eating dairy after meat in the same meal but allows dairy "in a different meal."

The אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים interprets this as requiring one to wait the standard length of time between two meals, which in the time of the אֲחֵרֵי שֶׁנִּיָּלַץ הַבָּשָׂר בֵּין הַשָּׁנִימִים was six hours (The hours referred to here are standard hours (60 minutes) not proportional hours (1/12 of the day or night).), before eating dairy after meat.

1. p. 63

2. p. ?

If one just chewed meat without swallowing, there's no need to be stringent and wait six hours instead of one. This is because according to ¹there is *no* waiting period required in such a situation, as the lingering flavor he considers the basis of the waiting requirement lingers in the *throat* and is therefore only triggered by *swallowing* meat, so in this case one can rely on the combination of ² v³ could require no waiting and those who generally only require an hour (⁴ ^...â^r%D ^•Ý). Presumably he would apply this same logic to one who ate fat, because fat doesn't stick in the teeth and so would not trigger any waiting period according to the ^...D] %Ý.

Cleansing the Palate (^uÛ^ Õ]r“

In order to remove flavor from one's mouth, one must do ^uÛ^ Õ]r †Æ—Bâ v— —ær'Â v†–6, vR v–ÆÂ &VfW cleansing the palate. It is accomplished by eating something that will scrape his mouth somewhat, like bread or a cracker, but not with something sticky, like flour, dates, or vegetables, as they don't work well for this purpose (^•Õ"^^" ä]f¥Ñ). The food must be swallowed, not just chewed (^B%ê ^•]B'â

Meat After Dairy:

1. p. ?

Unlike eating dairy after meat^[1], there is no waiting period to eat meat after eating dairy (אֲחֵרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד). This is because the two reasons that are given for the post-meat waiting period, namely lingering flavor and pieces stuck between the teeth, do not apply to dairy, which doesn't stick in the teeth or leave a lingering flavor. Therefore, one who eats dairy and wants to eat meat need only check his hands for dairy residue (The אַחֲרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד). If one had access to a good light (such as modern electric lights) then he can just check his hands, like by day (אֲחֵרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד). If one is eating with utensils, in which case he doesn't need to wash his hands (אֲחֵרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד). (or, at night when there's not enough light (If one had access to a good light (such as modern electric lights) then he can just check his hands, like by day (אֲחֵרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד).) rinse his mouth. Even this is only necessary for the meat of a domesticated animal (because it is included in] נֶמֶץ רֵשׁ וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... or not domesticated (because it is visually similar to the meat of a domesticated animal, even though its only included in] נֶמֶץ רֵשׁ וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... included in] נֶמֶץ רֵשׁ וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... very similar to a domesticated animal.].

The אַחֲרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... waiting for the dairy period as that of [3] even from dairy to meat (even the meat of birds). He then rules that one should be stringent like this opinion when eating hard cheese^[4], because it can get stuck between the teeth and it has a strong flavor that lingers, but there are opinions who are lenient and so we should not protest those who don't wait even after hard cheese.

The]עֵשֶׂה (]עֵשֶׂה וְ]נֶמֶץ רֵשׁ וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ...) describes the terrible spiritual harms that befall "together, in the same hour (although the word used can be translated as "in the same time period", implying less than an hour), or in the same meal." Because of this, there are those who are stringent to wait an hour between dairy and meat. Those who wait half an hour are presumably combining this with the principle of אַחֲרֵי שֶׁאָכַל חֵלֶב אֵין צָרִיךְ לַעֲמֹד... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... וְשֶׁנֶּחֱמָהּ בְּיָדָאָהּ... waiting just over half an hour is effectively the same as waiting an hour.

Metal Knives:

Metal knives have an extra method of having their meat/dairy status removed, and that is to stab them repeatedly into hard earth (^ â]•æ]B Ñ^uè^uâ). That said, this method is not ideal, and the custom has become to have separate knives for dairy and meat, respectively, and to mark^[These marks were seemingly things like notches or other marks that are not clear in and of themselves that they were marking the knife as dairy, which is why the ^...P"] 6 —2 æ÷B Fò F—`fer from the custom to mark the dairy knives specifically, as marking the meat knives instead would lead others assume that the meat knives were, in fact, dairy.] the dairy knives^[Nowadays that we use stickers that say]uÜ] ù and] é^...ù or knives with blue and red handles, it seems that there would be no reason to mark the dairy knives specifically, as our method of marking is unambiguous and a meat knife so marked will be obviously meat to an observer.], and one should not differ from the custom^[According to this, it would presumably be, at least, discouraged nowadays to have a red knife for dairy or a blue knife for meat, as any outsider using the kitchen would think the red is meat and the blue is dairy.] (^...P"] ä]f¥Ó). The ^'%'ú (^•Ý) adds that although this is true, in an extenuating circumstance wherein only has access to one knife he may perform ^ â]•æ]B Fò 7v—F6, &WGvVVâ ÖV B æB F —'.

Salt Dishes:

It is prohibited to place a salt dish (an uncovered utensil containing salt) near a meat or dairy dip, lest some of the dip fall into the dish, get hidden by the salt, and then, when the salt is used at a different meal of the opposite kind (milk or meat), the meat/milk dip that fell into the salt will get combined, along with the salt, with the milk/meat of the meal (^•Ö"^^ æ]C¥Ô). This stringency would not apply to a bowl of vinegar, even though it is also placed on the table at meals (^•Ý), because the dip will dissolve in the vinegar, and therefore has the ability to become] Ø]ÂÂ 6ò vRw&R not as worried (],%Ö]Ué"]¢ é]Ò'â

This law only applies if the salt dish is uncovered, as there is a possibility the dip will fall in, and is only]ÅÛ^¥×]•Ü]Bâ —b öæR F—B Æ 6R F†R 6 ÇB æV " F†R F— Â vR Fò æ÷B æVVB Fò 77VÖR F† B F† salt (^...P"] é]Ò'â

Salt in Meat/Dairy Utensils:

If one uses a clean, kosher meat/dairy utensil as a salt dish, the salt does not absorb flavor of meat or milk and can therefore be used for dairy/meat (Shulchan Aruch Yoreh De'ah 333:1). This would also be true for a clean, kosher salt dish of metal or glass. A salt dish could not absorb kosher salt flavor and would remain permitted for use with other food (Shulchan Aruch Yoreh De'ah 333:1). The Shulchan Aruch (Yoreh De'ah 333:1) states that a salt dish is kosher if it is made of earthenware (p'ot) or metal (metaltal) and is not used for dairy/meat, and one who is stringent like this opinion (Mishna Berura 333:1) is correct.

Contact:

The combination that we are safeguarding against is one that cannot be undone, such as liquids mixing together or U^{E} of milk penetrating meat (or vice versa). Contact between cold solids (meat and cheese), however, is not something we are very concerned about, as all that needs to be done to rectify the situation is to rinse^[1] (U^{E}) the points of contact between the meat and cheese^[3]. Additionally, the transgression if one were to eat it without U^{E} would only be rabbinic in nature^[4]. Furthermore, if one were to roast or salt the meat or cheese so that the residue is absorbed (U^{E}) (and certainly if one were to cook the meat so that the residue is distributed throughout the entire piece of meat), the residue is such an insignificant amount that the meat or cheese wouldn't even need U^{E} $\text{B} \pm 6\text{VR} \text{ä}^{\text{C}} \text{á}^{\text{E}} \text{D} \wedge \% \zeta]^{\text{A}}$ Therefore, one can even wrap meat and cheese in the same bundle and worry that they might come into contact with each other (U^{E} D).

Levels of Salting:

Not just any salting qualifies as *ḥalal*—specific requirements for both the quantity of salt required, as well as for how long the salt must be on the food.

lâÜ]•× lÅç]5Ù^...Ô:

The most basic level is *ḥalẖ* (lit. salting for the pot), which is the level of salting required to kash (draw out the blood) meat, which requires fully coating the surface of the meat with salt. The status of *ḥalẖ* begins immediately and continues for the length of time it takes a pot to boil, which is approximately 18 minutes, at which point all of the blood has been expelled and the salt's strength is considered spent.

If this level of salting was applied to kashered (bloodless) meat (or any other substance), the status of [א]•× [מ]U[ר] FöW6âwB 7F 'B VçF-Â gFW" , Ö-çWFW2Â æB —B 6öçF-çVW2 6ò Æöær 2 Ft because there's no blood extraction to spend its strength (^•Ö""^" æ] ¥Ô).

The reason for this distinction is that salt is not $\wedge \dots \tilde{\mathcal{O}} \wedge \Psi \times$ in a vacuum — it needs to be acting on something. Therefore, when bloody meat is salted and immediately begins expelling blood, it is immediately considered $\wedge \dots \tilde{\mathcal{O}} \wedge \Psi \times$. However, when the meat doesn't contain any blood, nothing is happening when the salt is first placed on the meat and so there is no $\wedge \dots \hat{e}] \bullet \times] \mathcal{U} \hat{e}$. Once the salt has been on for 18 minutes, the meat itself absorbs the salt, and salty meat is always considered $\wedge \dots \tilde{\mathcal{O}} \wedge \Psi \times$.

The $\wedge^{\circ}\% \acute{U} (\wedge^{\circ}\acute{Y} \wedge^{\circ}\% \S] \cdot \P)$ says that this distinction as $\text{f} \wedge^{\circ}\text{as}$ is the opinion of $\hat{\text{e}} \times \text{f} \times \hat{\text{e}} \wedge^{\circ} \dots \beta$ and is rejected by nearly all other $\wedge^{\circ} \dots \P \wedge^{\circ} \cdot \grave{\text{a}}] \cdot \acute{Y}$. He therefore rules that one must treat even bloodless meat as $\wedge^{\circ} \dots \tilde{\text{O}} \wedge^{\circ} \text{Y} \times$ as soon as a salt is placed upon it.

The ^{^...}...[]] ...^{æ]} ¥^Ö) cites an opinion that disagrees with this distinction as far as ^{and} ^{had} ^{says}...^{ê]}•^{×]}U^ê that even bloodless meat ceases to be ^{^...}Ö[¥]× after 18 minutes. He rules that one may rely on this opinion in extenuating circumstances, such as a significant financial loss ([]]E^ä ^ ^Ó ^jä^{è]}U^Ñ]^B ÷" -^b F[†]R ^{fö}ö^B — needed for a [^] ^{â]}U^Ó^[¢] ^p^^eÖ]^Bà

|\aÜ|•× |\Aæ|\AÙ:

The lowest level of salting is $\frac{1}{8}$, which is the amount of salt that one places on meat to season it for roasting (or any other cooking method). This level of salting has no effect as far as $\frac{1}{8}$ meat that is salted to this level touches cheese, it is treated the same as if it was unsalted^[1]. The $\frac{1}{8}$ ($\frac{1}{8}$) — 2 F + B nowadays that we are not experts in what is considered $\frac{1}{8}$ $\frac{1}{8}$ $\frac{1}{8}$, even as $\frac{1}{8}$ except where such a ruling would result in a significant financial loss.

Drippings:

Although meat that is $\mathbb{J}^{\mathbb{A}}\mathbb{U}^{\bullet} \times \mathbb{J}^{\mathbb{A}}\mathbb{U}^{\bullet}$ is itself not $\mathbb{J}^{\mathbb{U}^{\mathbb{A}}}\mathbb{U}^{\mathbb{A}} \otimes \mathbb{J}^{\mathbb{U}^{\mathbb{A}}}\mathbb{U}^{\mathbb{A}}$ and is therefore not $\wedge \dots \tilde{\mathbb{O}}^{\mathbb{A}} \times$, therefore, $\wedge \dots \tilde{\mathbb{O}}^{\mathbb{A}} \times$ (see $\wedge \dots \mathbb{P}^{\mathbb{A}}$) $\in \mathbb{O}^{\mathbb{A}}$

$\lfloor \mathfrak{a} \ddot{\mathfrak{U}} \rfloor \bullet \times \lfloor \mathring{\mathbf{A}} \hat{\mathbf{O}}^{\wedge} \mathfrak{e} \grave{\mathfrak{a}} \rfloor \bullet \hat{\mathfrak{a}} :$

The level above $\mathbb{A}^1_{\mathbb{A}^1} \times \mathbb{A}^1_{\mathbb{A}^1} \dots \hat{\mathbb{A}}^1$ is $\mathbb{A}^1_{\mathbb{A}^1} \times \mathbb{A}^1_{\mathbb{A}^1} \hat{\mathbb{A}}^1$, which is salting to preserve for storage.

]aÜ]•x]AÓ^...Ú:

The most intense level of salting is $\text{NaCl} \times \text{Na}_2\text{CO}_3 \dots \text{Na}_2\text{SO}_4$, salting to preserve for travel, which needs a higher level of salting than salting for storage^[2] so that it can withstand exposure to the elements.

1. see] é^, Ñ]uÜ] Â vVæW& Â 6öçF 7BÂ â ð

2. p. 85

How " $\hat{\cdot}\tilde{\text{O}}^{\wedge}\text{Y}^{\times}$ " is $\text{J}\hat{\text{a}}\ddot{\text{U}}\text{J}\cdot\times\text{J}\mu\grave{\text{e}}\text{J}\text{U}\hat{\text{e}}\text{J}\text{s}\check{\text{d}}$

When food is $\text{J}\hat{\text{U}}^{\wedge}\tilde{\text{O}}^{\wedge}\text{D}\text{J}\mu\ddot{\text{U}}\text{J}\hat{\text{a}}\times\text{J}\hat{\text{a}}\hat{\text{e}}\text{J}\hat{\text{a}}\ddot{\text{U}}\text{J}\text{u}\tilde{\text{O}}$ and therefore obtains the status of $\text{J}\hat{\text{a}}\ddot{\text{U}}\text{J}\cdot\times\text{J}\mu\grave{\text{e}}\text{J}\text{U}\hat{\text{e}}\text{J}\text{r}\hat{\text{A}}\text{v}\dagger\text{B}\text{f}\hat{\text{A}}\text{vor}$ to dispute. The " $\hat{\cdot}\tilde{\text{O}}^{\wedge}$ " $\dots\hat{\text{e}}\text{J}\text{Y}\hat{\text{O}}\text{J}$ rules that salted food imparts flavor but does not absorb flavor, and it imparts its flavor to the depth of a $\text{J}\hat{\text{u}}\ddot{\text{U}}\text{J}\cdot\hat{\text{a}}\text{J}$ (What it's not fatty^[2]). Therefore, if salted meat comes into contact with unsalted cheese or vice versa, the unsalted food needs $\text{J}\hat{\text{u}}\ddot{\text{U}}\text{J}\cdot\hat{\text{a}}\text{J}\text{B}\text{v}\dagger\text{A}\text{ER}\text{F}\dagger\text{R}\text{G}\text{ÇFVB}\text{föB}\text{§W7B}$ needs $\text{J}\hat{\text{u}}\ddot{\text{U}}\text{J}\cdot\hat{\text{a}}\text{J}\text{B}\hat{\text{A}}\text{2}\text{V}\text{6}, -\times\text{'G2}-\text{G2}\text{f}\hat{\text{A}}\text{vor}$ to the other. If both items were dry they don't impart flavor, even though they are salted. If even one of them is moist, even only the unsalted, then the salted imparts its flavor using the moisture as a medium. The " $\hat{\cdot}\dots\text{D}$ " $\text{J}\text{'\&-æw2}$ an opinion that flavor transfers both ways, even when only one is salted and, although we don't rule like that opinion, says we should be stringent when doing so will not lead to a financial loss ($\text{J}\hat{\text{u}}\hat{\text{O}}\text{:J}\text{'\hat{a}}$ The " $\hat{\cdot}\dots\text{D}$ " $\dots\hat{\text{e}}\text{J}\hat{\text{O}}\text{'V}\hat{\text{A}}\text{EW2}\text{F}\dagger\text{B}\text{F}\dagger-\text{2}\text{F}\dagger\text{B}\text{F}\dagger\text{R}\text{G}\text{ÇFVB}\text{öæÇ}\text{'}-\times\text{'G2}\text{æB}\text{FöW6}\hat{\text{a}}\text{wB}\text{'6}\div\text{'\&"}-\text{2}$ substance is solid; If it's liquid, the salted substance will absorb some of it[^][If the liquid was not diluted by water. If it was diluted, the water within it is considered to have rinsed the meat and removes its status of $\text{J}\hat{\text{a}}\ddot{\text{U}}\text{J}\cdot\times\text{J}\mu\grave{\text{e}}\text{J}\text{U}\hat{\text{e}}\text{J}\text{r}\text{Fö}\text{F}\dagger\text{R}\text{ö-çB}\text{F}\dagger\text{B}-\text{B}$ pon't absorb the liquid.]. If the salted substance was fully dry, however, it wouldn't even absorb liquid[^][This obviously only holds true until the liquid penetrates the dry substance and rehydrates it.].

Depth of Flavor Transfer:

Food that reaches the status of $\text{J}\hat{\text{a}}\ddot{\text{U}}\text{J}\cdot\times\text{J}\mu\grave{\text{e}}\text{J}\text{U}\hat{\text{e}}\text{J}\text{r}-\times\text{'G2}-\text{G2}\text{f}\hat{\text{A}}\text{vor}$ to the depth of a $\text{J}\hat{\text{u}}\ddot{\text{U}}\text{J}\cdot\hat{\text{a}}\text{J}\text{B}\hat{\text{A}}\text{Væ}\hat{\text{A}}\text{EW72}\text{F}\dagger\text{B}$ fatty, in which case the fat carries the flavor throughout the second substance. Not only that, if the second (non-fatty) food is also salted and would normally only impart its flavor to the depth of a $\text{J}\hat{\text{u}}\ddot{\text{U}}\text{J}\cdot\hat{\text{a}}\text{J}\text{B}\hat{\text{A}}\text{F}\dagger\text{R}$ 'at of the first food permeates it and makes the second food fatty as well, which in turn imparts its flavor throughout the first food ($\hat{\cdot}\tilde{\text{O}}^{\wedge}$ $\hat{\text{e}}\text{J}\text{Y}\tilde{\text{O}}\text{J}$).

Taarovot — Mixtures

] Û]...Õ]Ã

Under basic Torah law, in any mixture, so long as it is not perfectly even, the minority is nullified in the majority and the mixture is treated as purely consisting of the majority. The primary consequence of this is that if something that is forbidden to be eaten gets mixed with food that is permitted (in a scenario where the two components are visually indistinguishable), so long as the permitted food makes up more than 50% of the mixture, the entire mixture may be consumed, with no concern for the prohibited component.

There are, however, myriad exceptions and qualifications to this rule:

] Ü]•â]Uê &]...â]Ò Û^%Û^ue:

When food is cooked, it imparts flavor into the utensil it is being cooked in and to any other food or liquid cooked with it. This flavor is called] Ü]•â]Uê (a plural term that literally translates as "absorptions", referring to the particles of flavor that have been absorbed). When the utensil is later cooked in, the] Ü]•â]Uê are then emitted by the utensil into the new food being cooked. Now, the] Ü]•â]Uê emitted by the utensil shouldn't be relevant, as they will be the minority component of any mixture and will therefore be nullified. There is, however, an exception to the rule of] Û]...Õ]Ã 6 ÆÆVB Ø^% (lit. flavor akin to essence), which means that so long as something can be tasted in a mixture, even if there is only flavor and no physical essence present, it is considered to be present and not nullified. If] Û^ Õ^, pas mixed with]EÛ^¥è, the ^•Õ"^^" ...æ] ¥Ð) holds that the mixture can be given to a non-jew and if he doesn't detect the taste of the] Û^ Õ^, -â F†R Ö—‡GW&RÂ —Bw2 W&Ö—GFVBâ The ^...p"] g we don't rely on a non-jew. He therefore rules that we must calculate if the] Û]...Õ]Ã Ñ^é]•Ý

] Û]...Õ]Ã Ñ^•é]•Ý:

The $\hat{\Lambda} \dots \tilde{N}^{\wedge} \beta$ calculated that the ratio required to nullify flavor is 60:1 (60 parts permitted substance to one part flavor). At this ratio the flavor is assumed not to be present. This is referred to as $\int \hat{U} \dots \tilde{O} \hat{A} \tilde{N}^{\wedge} \bullet \acute{e} \bullet \acute{Y}$ (Nullification in 60).

$\int \hat{a} \hat{U} \int \hat{o} \tilde{N} \int \hat{a} \hat{U}^{\wedge} \tilde{O}$:

Until now we've been discussing mixtures of substances with differing flavors, which makes $\int \hat{U} \dots \tilde{O} \hat{A}$ simple: when the minority flavor can no longer be detected, there's no more $\int \dots \hat{a} \int \hat{o} \hat{U}^{\wedge} \% \hat{U}^{\wedge} u^{\hat{e}}$. However, when the two substances have the same flavor (such as permissible milk mixed with prohibited milk), there are two, opposite approaches:

- According to $\hat{\Lambda} \dots \acute{e} \int \hat{A} F \dagger R \ \& \ddot{o} \dagger - \& - FVB \ddot{O} - \mathcal{A}^2 - 2 \mathfrak{a} Pver \int \emptyset \int \hat{A} \hat{A} \ \& V6 W6R F \dagger R \ddot{O} - \mathfrak{z} GW \& R \ \hat{A} ways$ and the prohibited milk is contributing to that taste, no matter how little.
- The accepted opinion is that of $\hat{\Lambda}, \% \hat{e}$, who holds that the milk is $\int \emptyset \int \hat{A} \ B F \dagger R \ 6 \ddot{O} R \ \& F - \ddot{o} \ddot{o} b \ \acute{o} c \ 2 \ \grave{a} y$ other substance, there's just no recourse of having a non-jew taste the food, even according to those that allow that by differing substances.

$\hat{\Lambda} u \hat{U} \int \bullet \ddot{a} \int C$

If a prohibited substance is absorbed into a permitted substance $\int \mu \acute{O} \int \hat{e} \int \hat{A} \hat{U} \int \hat{e} \int \hat{B} \times W7B \ \& R \ \& V\ddot{O} \ddot{o} ved$. If, however, the $\hat{\Lambda} u \hat{U} \int \bullet \ddot{a} \int B - 2 \mathfrak{a} \div B \ \& V\ddot{O} \ddot{o} ved$ and the permitted substance is cooked, the cooking distributes the prohibited substance throughout the permitted substance, and it is therefore $\int \emptyset \int \hat{A} \hat{a} \int 77V\ddot{O} - \mathfrak{a} r F \dagger R \ \zeta \int \hat{A} \hat{U}^{\wedge} E\hat{O}$ is less than 1/60 of the total, which it almost certainly is] ($\hat{\Lambda} \bullet \tilde{O}''^{\wedge} \hat{U} \int R \% \acute{O} \ \wedge e \mathcal{D} : \int 2 \tilde{O} \int E\hat{O} \int B \ \acute{e} \int \hat{O}' \hat{A} \ \zeta F \dagger \div Vv, F \dagger R \ \zeta$ removed. If the permitted substance was a liquid, there is no $\hat{\Lambda} u \hat{U} \int \bullet \ddot{a} \int B F\hat{o} \ \& V\ddot{O} \ddot{o} ve$ because the liquid that touched the $\int \hat{U}^{\wedge} \tilde{O}^{\wedge}, F\ddot{o} W2 \mathfrak{a} \div B \ 7F' \ WB\hat{a}$ Therefore, so long as the liquid has 60 times the volume of what would be a $\hat{\Lambda} u \hat{U} \int \bullet \ddot{a} \int B \hat{A} - Bw2 \ \mathfrak{p} \int U\hat{e}^{\wedge}, \mathfrak{z} 6VR \ \emptyset'' \int b \ \acute{e} \int \hat{O} \ \acute{a}''^{\wedge} r \ \ddot{O}$).

Exceptions to $\int \hat{U} \dots \tilde{O} \hat{A} \tilde{N}^{\wedge} \bullet \acute{e} \bullet \acute{Y}$:

There are a few things that the $\hat{\Lambda} \dots \tilde{N}^{\wedge} \beta$ said are not $\int \emptyset \int \hat{A} \tilde{N}^{\wedge} \bullet \acute{e} \bullet \acute{Y}$ and in fact are never nullified:

$\int \hat{a} \hat{a} \int \hat{a} \hat{U} \int 3$

1. see Measurements, $\int \mu \acute{O} \int \hat{e} \int \hat{A} \hat{U}^{\wedge} E\hat{O}$, p. ?

Something that gives the food its structure is not nullified no matter how little is present. This is because even if there is barely any of the prohibited substance present, its presence is felt because it gave the food its structure.

This is only true if the $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \text{---} 2 \text{---} \text{çG\&---ç6---6 } \hat{\text{A}} \hat{\text{C}}' \text{ \&otimes---\&---FVB\hat{A}}$ ut if it's only the combination of the $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2$ primary substance that is prohibited than the $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2$ be nullified. ($\wedge \dots \hat{\text{P}}'' \text{]} \text{ } \hat{\text{U}} \text{]} \text{R} \% \hat{\text{O}} \wedge \hat{\text{E}} \hat{\text{O}} \text{:} \text{]} \cdot \hat{\text{D}}$) The $\wedge \dots \hat{\text{P}}'' \text{]} \text{ } \text{FG2 F}$ the $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \text{---} 2 \text{---} \text{çG\&---ç6---6 } \hat{\text{A}} \hat{\text{C}}' \text{ \&otimes---\&---FVB ---B}$ could still only not be nullified if there wasn't another, permitted $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \text{ \&W6VçB\hat{a} ---b F\hat{+} \text{W\&R pas}$ another such $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \text{ \&W6VçB\hat{a} vR}$ could say $\text{[e}\hat{\text{O}} \text{]U}\hat{\text{O}} \text{]} \text{B } \hat{\text{O}} \text{]}$ and the mixture would be permitted.

The $\wedge' \% \hat{\text{U}} (\wedge \cdot \hat{\text{Y}} \wedge \% \text{ç } \text{[}\hat{\text{A}} \hat{\text{O}} \text{])}$ adds a qualification to this ruling of the $\wedge \dots \hat{\text{P}}'' \text{]} \text{ } \hat{\text{+}} \text{F}\hat{+} \text{B F}\hat{+} \text{R } \hat{\text{e}} \text{]} \hat{\text{a}} \% \hat{\text{D}}$ seems to disagree only say $\text{[e}\hat{\text{O}} \text{]U}\hat{\text{O}} \text{]} \text{B } \hat{\text{O}} \text{]} \text{U}\hat{\text{e}} \text{]} \hat{\text{O}} \text{---b F}\hat{+} \text{W\&R pasn't enough of the prohibited } \text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \text{ F}\hat{\text{o}} \text{ \&R V`fective on its own. }$ enough of the prohibited $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \hat{\text{A}} \text{ F}\hat{+} \text{R } \hat{\text{O}} \text{---}\hat{\text{+}} \text{GW\&R}$ could be prohibited regardless of the permitted $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2 \hat{\text{a}}$

$\text{]} \cdot \hat{\text{O}} \wedge \hat{\text{O}} \text{]} \hat{\text{A}} \hat{\text{O}} \wedge$

The minimum heat required for the transfer of $\text{]} \hat{\text{U}} \text{]} \cdot \hat{\text{a}} \text{]} \text{U}\hat{\text{e}}$, (except in the $\text{[} \hat{\text{a}} \hat{\text{a}} \text{]} \hat{\text{a}} \hat{\text{U}} \text{]}_2$ sharp food with a knife, $\text{[} \hat{\text{a}} \hat{\text{U}} \text{]} \text{U}\times$, or possibly smoking^[2]) is $\text{]} \cdot \hat{\text{O}} \wedge \hat{\text{O}} \text{]} \hat{\text{A}} \hat{\text{O}} \wedge \text{ç } \hat{\text{+}} \hat{\text{A}} \text{---B\hat{a} F}\hat{+} \text{R } \hat{\text{+}} \text{æB \&V6ö---ç2' \hat{A} F}\hat{+} \text{R FV}\times \text{W\& GW\&R}$ person touching the heated item would recoil due to the heat. There are various opinions as to what this temperature is, ranging from about ~104°F to ~165°F.

$\wedge \hat{\text{O}} \wedge \text{¥B } \text{[} \dots \hat{\text{a}} \text{]} \hat{\text{O}} \hat{\text{U}} \wedge \hat{\text{E}} \hat{\text{O}} \text{]} \hat{\text{O}}$

The exception to $\text{[} \dots \hat{\text{a}} \text{]} \hat{\text{O}} \hat{\text{U}} \wedge \% \hat{\text{U}} \wedge \text{u}\hat{\text{e}}$ is if the flavor being imparted is detrimental to the dish it enters, this is called $\text{[} \dots \hat{\text{a}} \text{]} \hat{\text{O}} \hat{\text{U}} \wedge \hat{\text{E}} \hat{\text{O}} \text{]} \hat{\text{O}} \text{ } \hat{\text{+}} \hat{\text{A}} \text{---B\hat{a} ---\times 'G2 f\hat{A} vor deleteriously}$. It is important to note that $\wedge \hat{\text{O}} \wedge \text{¥B } \text{[} \dots \hat{\text{a}} \text{]} \hat{\text{O}} \hat{\text{U}} \wedge \hat{\text{E}} \hat{\text{O}} \text{]} \hat{\text{O}} \text{---} 2$ allowed to cause food to absorb $\text{]} \hat{\text{U}} \wedge \hat{\text{O}} \wedge$, $\text{F}\hat{+} \text{B ---} 2 \text{ } \hat{\text{a}} \text{]} \text{U}\hat{\text{e}} \text{]} \hat{\text{O}} \wedge \% \hat{\text{Y}} \text{ [}\hat{\text{A}} \hat{\text{a}} \text{]} \% \hat{\text{Y}}$ intentionally.

There are three kinds of $\wedge \hat{\text{O}} \wedge \text{¥B } \text{[} \dots \hat{\text{a}} \text{]} \hat{\text{O}} \hat{\text{U}} \wedge \hat{\text{E}} \hat{\text{O}} \text{]} \hat{\text{O}} \text{ç F}\hat{+} \text{---æw2 F}\hat{+} \text{B \&R ---æ}\hat{+} \text{W\&VçFç' F---6wW7F---æR\hat{A} F}\hat{+} \text{---æw2}$ disgusting but produce a bad flavor when combined with specific items, and $\text{]} \hat{\text{U}} \text{]} \cdot \hat{\text{a}} \text{]} \text{U}\hat{\text{e}}$ that have been absorbed in a utensil for 24 hours.

$\text{]} \text{¥ } \text{]} \cdot \hat{\text{O}} \text{]} \hat{\text{a}} \hat{\text{O}} \text{:}$

1. see $\text{]} \hat{\text{e}} \wedge$, $\hat{\text{N}} \text{[} \text{u}\hat{\text{U}} \text{]} \hat{\text{A}} \text{ } \hat{\text{6}} \hat{\text{o}} \text{ ¶---æR } \dots \text{U}\text{]} \hat{\text{O}} \wedge'' \hat{\text{A}} \hat{\text{a}} \hat{\text{o}}$

2. see $\text{]} \hat{\text{e}} \wedge$, $\hat{\text{N}} \text{[} \text{u}\hat{\text{U}} \text{]} \hat{\text{A}} \text{ } \#3\text{vV3''}\hat{\text{A}} \hat{\text{a}} \hat{\text{o}}$

sharpness of the food reinvigorates the] Ü•â]Uê, rendering the sharp food] á]Uê.

There is a dispute whether this applies to all sharp foods or just *juvavim*, —2 — exceptionally sharp food and is the only food about which this law is stated explicitly in the Gemara.

point where the $\mathbb{E}^{\wedge} \mathbb{Y}^{\epsilon}$ touched the $\mathbb{J}^{\wedge} \tilde{\mathcal{O}}^{\wedge, \hat{\mathcal{A}}} \& \mathbb{V}_6 \mathbb{W}_6 \mathbb{R} \vee \mathbb{R} \ 77 \mathbb{V} \ddot{\mathcal{O}} \mathbb{R} \mathbb{F}^{\dagger} \mathbb{B} \mathbb{F}^{\dagger} \mathbb{R} \mathbb{D} \mathbb{J} \cdot \acute{\mathbb{a}} \mathbb{U}^{\epsilon}$ left residue on the $\mathbb{J}^{\mathbb{E}}$

4. see Measurements, Surface Level, p. ?

Therefore, one may not enter any situation that necessitates $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$ deliberately, lest he forget to rinse the food before eating. That said, in a situation where the food is usually rinsed before consuming regardless, such as a piece of raw meat, one may deliberately put it into a situation that would necessitate $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$ $[\wedge \dots \hat{\text{a}}^{\text{r}} \% \text{D}$ brings a $\wedge \dots \text{D}] \hat{\text{B}} \hat{\text{A}}$ $\text{æB F} \dagger \text{R} \text{ä}''^{\text{æ}} \text{'\&—æw2 F} \dagger \text{R} \text{ä}] \hat{\text{a}} \% \hat{\text{O}}$, that this only and a utensil, but it would be prohibited to bring two food items (one of $\text{[} \hat{\text{U}}^{\text{æ}} \hat{\text{O}}^{\text{æ}}$, $\text{æB öæR öb} \hat{\text{O}} \text{]}\cdot \hat{\text{e}}^{\text{æ}}$, $\text{'—çF} \hat{\text{O}}$ contact $\text{[} \hat{\text{A}} \hat{\text{U}}^{\text{æ}} \text{¥} \times \text{]}\cdot \hat{\text{U}} \text{]} \hat{\text{B}} \hat{\text{A}}$ $\text{ÇF} \dagger \div \text{Vv}$, $\text{F} \dagger \text{R} \text{è}^{\text{æ}} \cdot \hat{\text{N}} \text{]} \hat{\text{A}}$ $\text{æB F} \dagger \text{R} \text{é}] \text{ç} \hat{\text{A}}$ gues and permits it unless the $\text{[} \hat{\text{U}}^{\text{æ}} \hat{\text{O}}^{\text{æ}}$, $\text{—2}^{\text{æ}}$ residue would require $\text{[} \hat{\text{A}} \hat{\text{U}}^{\text{æ}} \text{¥} \times \text{]}\cdot \hat{\text{U}} \text{]} \hat{\text{B}} \hat{\text{A}}$ because there is no real concern that it won't be rinsed ($\wedge \cdot \hat{\text{O}}''^{\text{æ}}$ $\text{æ}] \text{¥} \hat{\text{N}}$).

One only needs to perform $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$ in a situation where at least one of the items coming into contact with each other are moist so it leaves residue on the other $[\text{I am unsure whether one would need to rinse just the dry one, because it has residue on it from the moist one, or both because we are concerned that the moisture of the moist one draws residue from the dry one. I am leaning towards the latter option.}]$, but if they are both dry then their touching has no consequence ($\wedge^{\text{æ}} \% \hat{\text{U}}^{\text{æ}} \wedge^{\text{æ}} \text{r æ}] \hat{\text{a}}''^{\text{æ}} \text{r} \text{[} \text{'à}$

Utensils:

If one places cold food of $\text{[E} \hat{\text{U}}^{\text{æ}} \text{¥} \text{è}$ in a cold utensil of $\text{[} \hat{\text{U}}^{\text{æ}} \hat{\text{O}}^{\text{æ}}$, $\hat{\text{A}}$ $\text{F} \dagger \text{R} \text{é}] \text{R} \% \hat{\text{a}}$ ($\text{[} \cdot \hat{\text{O}}'' \text{]} \text{2 æ}] \text{¥} \hat{\text{N}}$) says that the food must be rinsed before consumption. The $\wedge \dots \text{D}] \dots \text{é}] \hat{\text{O}}^{\text{æ}}$ $\text{FG2 F} \dagger \text{B} \hat{\text{O}} \text{]} \text{5} \times \text{]} \text{B}$ could only be required if the food was moist, and that the utensil had only absorbed $\text{[} \hat{\text{U}}^{\text{æ}} \hat{\text{O}}^{\text{æ}}$, $\text{F} \dagger \text{R} \text{è}^{\text{æ}} \cdot \text{Vv}$, $\text{6ö} \text{æB} \text{N} \text{Q} \text{æ} \text{ç} \text{ç} \text{w} \text{]} \text{æ}$ and the food was dry, it does not need $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$ and may even be placed in the utensil $\text{[} \hat{\text{A}} \hat{\text{U}}^{\text{æ}} \text{¥} \times \text{]}\cdot \hat{\text{U}} \text{]} \hat{\text{B}} \hat{\text{A}}$

The $\text{[}, \% \hat{\text{O}} (\wedge \cdot \hat{\text{Y}}^{\text{æ}} \wedge \% \text{ç}] \text{'' V} \hat{\text{O}} \text{VæG2 F} \dagger \text{R} \text{è}] \text{a} \text{D}$ to say "if the utensil had only absorbed $\text{[} \hat{\text{U}}^{\text{æ}} \hat{\text{O}}^{\text{æ}}$, $\text{F} \dagger \text{R} \text{è}^{\text{æ}} \cdot \text{Vv}$, $\text{6ö} \text{æB} \text{N} \text{Q} \text{æ} \text{ç} \text{ç} \text{w} \text{]} \text{æ}$ food was dry" because either condition is enough that there is no risk of flavor transfer. He also adds that the utensil must be clean, because if it's not then there's no scenario in which the food would not need $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$.

The $\wedge^{\text{æ}} \% \hat{\text{U}}^{\text{æ}} (\wedge \cdot \hat{\text{Y}}^{\text{æ}} \wedge \% \text{ç}] \text{'' f} \div \text{æ6VgVÆÇ' \&V} \text{'V7G2 F} \dagger \text{R}$ Pxpplanation of the $\text{[}, \% \hat{\text{O}}$, because if the utensil is clean, of residue or flavor is there for $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$ to remove? Additionally, the $\wedge^{\text{æ}} \% \hat{\text{U}}^{\text{æ}}$ is baffled by the $\wedge \dots \text{D}] \text{w2 F—7F—æ7}$ between the utensil absorbing flavor through a heat-based transfer or a cold-based transfer. How does the way the flavor was absorbed by the utensil have any affect on whether it necessitates $\text{[E} \acute{\text{O}}\text{]u} \hat{\text{O}}$?

1. see Measurements, Surface Level, p. ?

2. see $\text{[} \text{é}^{\text{æ}}$, $\hat{\text{N}} \text{]} \text{u} \hat{\text{U}} \text{]} \hat{\text{A}}$ $\text{6ö} \text{æB} \text{N} \text{Q} \text{æ} \text{ç} \text{ç} \text{w} \text{]} \hat{\text{O}}^{\text{æ}} \text{'\& \hat{\text{A}}$ $\text{ä} \text{ö}$

The $\hat{\wedge}'\% \hat{U}$ therefore argues on the $\hat{\wedge} \dots \hat{p}] \hat{\alpha} B \emptyset''] b \hat{\alpha} B 'V \hat{A} E W 2 F \dagger B \hat{O}] 5 \times] B \text{---} 2 \hat{o} \hat{\alpha} \zeta' \hat{\alpha} V 6 W 7 6 '' \text{---} b F \dagger R W$

If the utensil is clean, then there is no reason to require $] E \acute{O}] u \hat{O}$ and one can even place the food in the utensil $] \hat{A} \hat{U} \wedge \Psi \times] \bullet \ddot{U}] B \hat{A} \zeta F \dagger \div V v, \hat{o} \hat{\alpha} \zeta' \text{---} b F \dagger \text{---} 2 \text{---} 2 F V \times \div \& '' ' \& \hat{\alpha} v \ddot{O} V \zeta B \hat{A} \div F \dagger W' v \text{---} 6 R v R \& R$ porridge. One should not forget and use the utensils for hot food (which would transfer $] \ddot{U}] \bullet \hat{a}] U \hat{e}$ of $] \hat{U} \wedge \hat{O} \wedge, \text{---} \zeta F \hat{o} F \dagger R \ddot{o} \hat{o} B' \hat{a} \text{ ``or example. One would be permitted to use a hotel's bowl and spoon for cereal, because one is only staying at the hotel for a short time, but if one were to sign a long-term lease on a fully furnished apartment formerly occupied by a non-jew, he would be required to Kasher^[1] the utensils before using them.$

1. see $\wedge \Psi \hat{U} \wedge u \hat{O}] \hat{o} \hat{U}] \hat{A} \hat{U}] \hat{O} \hat{A} \hat{O} \wedge \hat{e} \wedge \zeta \tilde{N}] \hat{A} \hat{U} \wedge \% \hat{O} \wedge \zeta \hat{A} \hat{a} \hat{\delta}$

Tikun Keilim — Vessel Rectification

There are two main scenarios that utensils would need rectification to be usable with food:

]...Ñ]•Ü^¢ û]ÅÙ]Ó

יעא...ה י י]•א]Uה:

When utensils absorb undesirable י י]•א]Uה (whether non-kosher, יuP^R &Vf÷&R ä^ ×, or meat/milk when the wants to use the utensil for milk/meat), the method for removing those י י]•א]Uה depends on two factors: the material from which the utensil is made and the method of cooking that imparted the י י]•א]Uה.

Materials:

Earthenware:

Earthenware can never be fully purged of י י]•א]Uה, so an earthenware utensil that absorbs from forbidden foods will forever prohibit anything cooked in it. If it absorbed from יuP^R —B 6 ææ÷B &R W6VB on ^Eá]r æB —â `act must be destroyed before ^Eá]r —b æ÷B 6öÆB Fò æöâÖ'Pw, and if it was used for meat/milk it can never be used for milk/meat.

This is all the case if the flavor was absorbed throughout the utensil. If, however, it was only absorbed to the depth of a פו,י]•א]Uה as the option to remove the ^uÜ]•ä]B ‡F‡&÷Vv, 6 æF—ærÂ f÷" Pxample) if he so desires (^'‰Ú י•Ö"]2 á' ^eD ^ ‰%ç י•×), although the ^B%ê (^•Ý ^ ‰%ç]r' F—67W76W2 F†R ÷76—&—Æ— absorbs throughout which would render ^uÜ]•ä]B —'&VÆPvant.

Glass:

According to most authorities, glass is incapable of absorbing י י]•א]Uה and so can never become prohibited (or יuP^R ÷" ÖV Böö—Æ²' Fò &Pgin with.

Metal:

Metal utensils can be purged of י י]•א]Uה but the method required depends on how the י י]•א]Uה entered. The removal method needs to be at least as intense as the way the י י]•א]Uה entered to begin with, therefore י י]•א]Uה that require a lower method can be purged by a higher method. The methods are:

יעò^%Ü]C

1. see Measurements, יuÓ] ç]ÄÜ^EÖ, p. ?

Utensils that have absorbed] Ü]•â]Uê through cooking require]EÖ^%Ü]BÂ –ÖÖW'6–öâ –â &ö–Æ–ær pater.

][ÄÜ] Ö]ò ç]Ã

Utensils that require]EÖ^%Ü]B —6âwB & 7F—6CÄÄÖÖW'6Fö to remove the] Ü]•â]Uê.

][ÄÜ] Ö]ò Ö]âÖ^f

When a utensil has absorbed] Ü]•â]Uê through exposure to an open flame, such as roasting or grilling, it requires][ÄÜ] Ö]ò †Æ—Bâ v†—FVæ–ær'Â v†–6, —2 †V F–ær F†R ÖWF Â Fò F†R ö–çB F† B —BÂ 66÷& opinions, is red hot, emits sparks, or achieves the temperature the food was roasted at.

Wood:

Wood seems to be treated like metal^[3], although][ÄÜ] Ö]ò Ö]âÖ^f not applicable, because wood can't be heated to that temperature without burning. Like earthenware^[5], one also has the option to be ^uÖ]Äã the wood if it absorbed something]μÓ]' ç]ÄÜ^EÖ.

General Laws:

Drippings:

If hot milk or fat falls on an unknown minority of a utensil, the utensil can be treated as neutral (not meat or dairy) and permitted because the dairy/meat/prohibited section, being that we don't know where it is and it's a minority, is] Ø]Â Ñ^...Ö] Â ÇF†÷Vv, –b —]EÖ^%Ü]BÂ –ÖÖW'6–öâ –â &ö–Æ–ær pater be performed (^B%ê]•Ö"]2 á' ^eD ^ %ç]r'à
